Name

Richard Gudaj

Gender

Male

Nationalityrgudaj@gmail.com**Email**rgudaj@gmail.com**When did or will you finish your PhD?**

June 2020

City, state, and country of residence

Nanjing, Jiangsu, China

University education

2017 – 2020 PhD in Agricultural Economics and Management at Nanjing Agricultural University, Nanjing, China. Dissertation: Socio-economic impact of Chinese agribusiness entrepreneurs in the Russian Far East on local farmers.

2014 – 2017 Master in Business Administration (MBA) at Hohai University, Nanjing, China. Thesis: Cross-border e-commerce strategic management of foreign company A in China.

2009 – 2013 PhD in Animal Science at University of Debrecen (Hungary) – scholarship. Dissertation: Study of animal welfare status and lameness in dairy cow herds in Hungary.

2007 – 2008 MSc in Animal Biology and Welfare at Writtle College (UK) and HAS Den Bosch (The Netherlands). Thesis: Cows behaviour as a response to rubber mats in parlour stalls.

2003 – 2007 BSc in Animal Sciences at Warsaw University of Life Sciences (Poland). Thesis: Beef cattle husbandry systems.

1999 – 2003 High School in Głowno (Poland). The extended programme of biology and English.

What are your reasons for applying to be a Science Corps Fellow? (max. 200 words)

I have always dreamed of becoming a scientist and helping give back to society, and I believe that a Science Corps Fellow would set me miles ahead to reaching my goal. My passion for agricultural economics started in China when I realized that there is an empty space in a descent agriculture research in developing countries.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship (max. 200 words)

During the first PhD in Hungary, I introduced animal welfare and lameness measures among 25 dairy farmers to increase their competitiveness and help them reach international husbandry standards. I did the same during my postdoc on three Weigang company dairy farms in Jiangsu Province in China. During my current, second PhD in China, I am studying the socio-economic impact of Chinese farmers in the Russian Far East on local, Russian farmers. In all projects, I coordinated the activities, supervised data collection, conducted data validation and wrote scientific publications. PhD and postdoc in animal science were full scholarships. The current PhD is a partial scholarship and the rest of the project is sponsored by myself, so I know what it means to work within a budget. Your project resonates with me because I own a 10 ha apple farm in Poland. In the first two weeks of May, blossoms can be hurt by frost and during the summer fruits can be damaged by hail. I have extended experience with crop loss and insurance. I understand the point of view of farmers because I am one of them. My current PhD thesis supervisor is an expert in econometrics and statistics and I passed this course (run by Prof. Ximing Wu from Texas A&M University) with 85%. I used SPSS in Hungary and Stata in China. I speak fluent Russian and Chinese.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia
Doing science in industry
Administrative role in industry or academia
In science education
In science outreach

Expand on your selection above and describe where you imagine yourself professionally in the near (2 year) and long-term (10 year) future (max. 200 words)

FAO, UN, Gov institution, multinational company or my own business related to English, Chinese, Russian, Polish, Hungarian, Arabic, Hindi, Spanish, French, Portuguese, Urdu, Bangla languages and agriculture.
