Post Graduate. Certificate in Education, University of KwaZulu-Natal, 2016
Mister in Science, Environmental Science, University of South Africa, 2015
Bachelor of Technology, Nature Conservation, Mangosuthu University of Technology, 2011
National Diploma, Nature Conservation, Mangosuthu University of Technology, 2010

What are your reasons for applying to be a Science Corps Fellow? (max. 200 words)

I am passionate teacher and I always want to take part in changing the lives of the children. I personally believe that these initiatives is going to enhance my experience and mostly disadvantage communities children are going to benefit from this such programme. When I

graduated with my PhD from University of South Africa in 2018, I vowed to myself that I am going to use it to assist other people in any way that I can assist them.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship (max. 200 words)

Involvement in all these activities also taught me confidence to drive as a team leader as well as work as a team, commitment, perseverance, punctuality, self-disciplined. I have learned to effectively manage time and strive towards attention for detail which has been sown in my problem solving skills.

In my teaching component, as a team leader, I have driven my team to achieve the best in what they do sometimes excelling beyond limitations. My extensive practical experience in research culminated in completing my PhD in the desired 3 years whilst being actively involved in teaching at secondary school levels. I was also contracted to Unisa as a Tutor for a short period of time.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia

In science education

In science outreach

As far as possible from science/education

Expand on your selection above and describe where you imagine yourself professionally in the near (2 year) and long-term (10 year) future (max. 200 words)

I see myself as one of best researcher in the field of Nature Conservation and Environmental Sciences. I want to start the environmental firm that are not going to be corrupted, the one that are going to act in best interest of the environment, the one that are always going to put the environment forward before the money. We have witness that our environment is dying people of greed of the people that utilize the environmental resources. So my dream is to start big corrupt free environmental firm that is going to fights with governments in order to ensure that that justice is done on the environment.
