Italian

Emailombretta.dellacqua@gmail.com**When did or will you finish your PhD?**

30th may 2018

City, state, and country of residence

Pavia, Italy

University education

PhD in Environmental Sciences (Marine Science), on 30th May 2018 at University of Genoa -
Master in Environmental Sciences (Marine Science), on 3rd October 2013 at university of
Genoa, Bachelor in Environmental Sciences (Marine Science), on 18 July 2010 at University
of Genoa

What are your reasons for applying to be a Science Corps Fellow? (max. 200 words)

I always longed for exiting experience where I would be able to learn about new realities and I've always travelled around the world to fulfill my dreams. If I may transmit, at the same time, my passion for the environment and sciences, it would be the best of all. I think everyone should be granted with the same opportunity to realize thir expectations. Havng the opportunity to be part of this project would fulfill mine.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship (max. 200 words)

Aside from private tutoring lessons for high school students, from June 2015 to May 2016 I got a collaboration with the University of Genoa as a tutor for students with specific learning disabilities. The job consisted in supporting the students during the preparation for their exams.

I travelled around the world alone a lot, becoming an independent and dependable person, able to face challenge and accustomed to planning and problem solving. I always carried out sports for self maintaining, plus specific ones (caving and climbing), in order to improve my ability to focus. Since long, I periodically volunteer near charity association and this helped me a lot in improving as a human being, able to face other people problem and view side. As a results, I am now a curious person, always seeking for stimulating situation, and a person adaptable to different social environment.

Where do you imagine yourself professionally in the future? Check all that apply.

Other

If other, please specify.

To do something I am passionate about and where I can make the difference. It doesn't matter physically where

Expand on your selection above and describe where you imagine yourself professionally in the near (2 year) and long-term (10 year) future (max. 200 words)

I never had a clear image of myself except for a person who is exactly doing what she is passionate about. Wether I will be an academic, an industry employee or a school teacher, I would be happy as long as I am be able to inject the same passion the supported me untill here.
