EDUCATION

PhD (European Labeled) in Marine Sciences - 30th May 2018 at the University of Genoa (Italy).

Supervisors: Prof. Chiantore, Prof. Ferrando

- **Embric Program** 16th September – 6th October 2018, Scotland. Evaluation of cytotoxic compounds in macroalgal (*Ulva spp.*) growth in different culture medium. Laboratory work.
- **Erasmus +** : 6th March – 5th July 2017; scholarship for accomplish my PhD thesis near the Advanced Functional Materials Group at Aalto University (Espoo, Finland).

Supervisor: Prof. Hannula

- **“Arctic zooplankton in western Svalbard waters” summer school** – 18th August – 1st September 2016 at the University of Svalbard (UNIS). Two weeks scientific cruise in three fjords of the Northern Barent Sea.
- **“Monitoring and early warning in biodiversity governance” summer school** – from 10th July to 24th July 2016, at the Siberian Federal University (SibFU). Stakeholders interviews on awareness on interaction between bears and humans in the Ergaki National Park.
- **Paolo Colantoni scientific cruise** – 8th – 16th May 2016; scientific diving in Maldives for accomplish the corals status check in the frame of a long-term monitoring project.
- **Supervision** of a Bachelor student for accomplish her thesis
- **Erasmus +** : 14th September – 27th November 2015; scholarship for accomplish my PhD thesis near the Marine Laboratory at Université Libre de Bruxelles. Supervisor: Prof. Dubois
- **XXX Italian Antarctic expedition.** Manipulative experiment at the Mario Zucchelli Station aquarium (Terra Nova Bay, Ross Sea), monitoring of coastal water parameters, collection of *A. colbecki* in order to add data to a long-term size frequency distribution.

Master Degree in Marine Science - 13th October 2013 at the University of Genoa; degree mark: 110/110 cum laude; in collaboration with Alfred Wegener Institute for Polar and Marine Research (AWI, Bremerhaven, Germany).

- **Erasmus Placement:** 28th February – 30th September 2012; scholarship for accomplish Master thesis near the Alfred Wegener Institute (Bremerhaven, Germany). Supervisor: Prof. Brey
- **Portofino LTER Monitoring Program:** 2010 – 2011. Sampling activities in the framework of the Portofino LTER Monitoring Program (Liguria, Italy): phytoplankton and zooplankton sampling, water sampling (Niskin) for nutrient and Oxygen determination (Winkler). Laboratory practices: determination of nutrients (Mass Spectrometry), Chlorophyll-a (fluorimetry) and oxygen (coulometric titration)

Bachelor Degree in Environmental Science - 18th March 2010 at the University of Genoa; degree mark: 107/110

- **Erasmus:** 1st March – 30th May 2009; scholarship for laboratory practice near the University of Aveiro (Portugal). Evaluation of the impact of lytic viruses in the microbial degradative potential.

JOB EXPERIENCE (ACADEMIC)

Research Assistant in the Anta-Biofilm PNRA project. 1st September 2017 – 30th August 2019 at the University of Genoa. Evaluation of potential effects of natural and anthropic disturbance on microbial community and macrobenthos settling in the littoral area near the Italian Station Mario Zucchelli (Ross Sea, Antarctica) after different deployment time and depth.

- Duties in Italy: experimental design, campaigns planning, materials shipping, coordination of the five operative units requirements, campaigns participations. After campaigns: assessment of the macrobenthic colonization occurred during panels deployment, Bachelor student supervision
- Duties in Antarctica: logistic activities planning, scuba diving planning and supervision, field and laboratory activities coordination and participation, samples processing, storage and shipping, scientific meeting and campaign reports writing. Field activities: collection of chemico-physical parameters of the water column, phytoplankton and seawater bacteria samples. Laboratory activities: isolation and growing of bacteria cultures, extracellular enzymatic analyses, differential treatment and storage for each of the five operative units.

Traineeship near Ethoikos Foundation (Radicondoli, Siena, Italy) – June 2014. Radio-tracking techniques in the frame of a project on presence, abundance and source-sink population dynamics of micromammals (*Arvicola spp.*). Traps setting, trapped mice collection and marking, radio-tracking. Supervisor: Dr. Cozzolino

OTHER JOB EXPERIENCE

June 2015 – May 2016: temporary job at the University of Genoa (Faculty of Sciences) as a tutor for students with specific learning disabilities. The job consisted in supporting the students during preparation for exams

July – August 2014: post-degree traineeship at Genoa Aquarium; tanks maintenance and animals feeding

June 2013 – June 2014: temporary job at the University of Genoa (Faculty of Sciences) as Students Coordinator Tutor. My duties included attending the Orientation Saloon for incoming new students, managing contacts with the referent professors and building the Power Point presentation of the School of Sciences Faculty

2013 – 2014: private mathematical lessons

June – September 2011: temporary job at the Languages and Political Science Faculty Registry at University of Genoa: back office service

December 2007 – June 2008: temporary job at the Department of Chemistry and Industrial Chemistry at University of Genoa: data entering in the online library of the Chemistry Department

2004 – 2011: various intermittent service jobs in hotels and restaurants

1997 – 2012: free-lance drawer

TECHNICAL SKILLS

- ✓ Experiment design and conduction
- ✓ Bacterial culture isolation and growing, medium preparation
- ✓ EEA (extracellular enzymatic activity)
- ✓ Micro- and macroalgae culture; invertebrates maintenance in aquarium
- ✓ Microscope techniques, in particular Scanning Electron Microscope (SEM), including samples preparation (resin embedding and carbon/golden coating)
- ✓ Histology: paraffin inclusion, microtome slides preparation, Hematoxylin-Eosin and Alcian-Blue PAS staining
- ✓ Sea urchins fertilization assay
- ✓ Biomechanics: bending test, tri-bending test, compression test, nanoindentation, Vickers indentation
- ✓ Oceanographic sampling: naturalist dredge, Van Veen grab, plankton net, CTD, Niskin, nutrient collection
- ✓ Report writing
- ✓ Statistical skills: discrete and continuous function of distribution of probability and related tests, linear and non-linear regression analysis and related tests, ANOVA, Kruskal test, GLMM, LMM, Anosim; R software

English: fluent

Drive license: car

SCUBA license: Advanced Diver ESA, Nitrox

Scientific diving experience: Yes (confirmation can be asked to Dr. Montefalcone, monica.montefalcone@unige.it)
