To: fellows@science-corps.org

Name

Sandul Yasobant

Gender

Male

Nationality

Indian

Emaildryasobant@gmail.com**When did or will you finish your PhD?**

December 2020

City, state, and country of residence

Gandhinagar, Gujarat, India

University education

Ph. D. in Public Health (2017 to 2020)- Faculty of Medicine, University of Bonn, Germany
Master in Public Health (MPH) in Occupational & Environmental Health (OEH) (2011 to 2013)- Sri Ramachandra University, Chennai, Tamil Nadu, India
Bachelor of Physiotherapist (BPT) (2005 to 2010)- Utkal University, Bhubaneswar, Odisha, India

What are your reasons for applying to be a Science Corps Fellow? (max. 200 words)

Dear Selection Committee,
I have recently completed my doctoral study from the Faculty of Medicine, University of Bonn, Germany in an interesting domain "One Health". With the current ongoing pandemic of COVID19, One Health, which considers the health for all at the interface of the human-animal-ecosystem, is being popularized across the globe. With a background in health

science, experience in public health, I am passionate enough to translate my knowledge of One Health to the younger generation. This is the prime reason why I am much fascinated to be part of the Science Corps. With the fellowship, I could envisage breaking the barrier of research and the applied science. As teaching is my passion, I would like to initiate this from the grassroots level of education. As public health and one health remain of utmost importance to be translated at the grassroots level, I found myself to be one among others best suited for this fellowship.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship (max. 200 words)

I am fascinated enough to design and pilot test the modules of public health (basics of disease transmission, prevention strategies) and one health (focusing ecosystem approach) for the healthier world.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia

Expand on your selection above and describe where you imagine yourself professionally in the near (2 year) and long-term (10 year) future (max. 200 words)

In a long run, I would like to be associated with a public health institute conducting primary research, however, in shorter-term, I am aiming to bridge the gaps at the community level.

CV/Resumé
