Name

Roël HOUDANON

Gender

Male

Nationality

Beninese

Emailroelhoudanon@yahoo.fr**When did or will you finish your PhD?**

January 20, 2021

City, state, and country of residence

Benin

University education

PhD in Mycology and interaction Soil-Plant-Fungi, Vegetation, microclimate, soil parameters, phylogenetic affiliation and natural productions of edible ectomycorrhizal fungi from the Soudano-Guinean ecozone of Benin (West-Africa), University of Parakou,, January 20, 2020

Master of Science in Ecology and Biodiversity, Causes of deforestation in the region of Menabe in Madagascar, University of Antananarivo, December 11, 2014

Mphil in Management of Natural Resources, Ethnobotanical and ecological evaluation of bamboo in southern and middle Benin, University of Abomey-calavi, 2013

Agricultural Engineer Degree in Management of Natural Resources, Floristic and physiognomic change in rangelands in the transboundary biosphere reserve of W (Benin), University of Abomey-calavi, 2011

What are your reasons for applying to be a Science Corps Fellow? (max. 200 words)

My reasons for applying to this fellowship is to improve my ability to transmit my knowledge which is an important skill for anyone in the research and teaching field. Also, being selected for this fellowship, will allow me to learn myself, to deepen my knowledge even more in my area of expertise because in the training of others there is a part of self-training. Finally, this fellowship will allow me to meet other people, to expand my address book, very important thing in building a good career.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship (max. 200 words)

During my studies, I have already given several courses at the university and training to local populations as a university assistant, community project manager or head of research project. Thus, I was an assistant for 2 years at the University of Abomey-Calavi, 3 years at the University of Parakou in courses relating to species ecology, phylogeny, etc. I also trained rural populations in mushroom production, conservation of natural resources and manage several awareness sessions.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia
Doing science in industry

Expand on your selection above and describe where you imagine yourself professionally in the near (2 year) and long-term (10 year) future (max. 200 words)

Having extensive knowledge in DNA extraction, phylogeny and products to use, in 2 years or even 10 years, I see myself in an industry producing laboratory consumables in the field of genetics. Also I have a passion for education and I also see myself as a teacher-researcher in the field of environmental mycology

CV/Resumé
