

Anika Neu

Zoological Institute & Museum
Animal Ecology
University of Greifswald
17489 Greifswald
Germany

Current address:
Böttgerstraße 7
13357 Berlin

Mail: anika.neu@gmx.de
Phone: +49177 2487544

Born: 26th of June 1991 (in: Güstrow, Germany)

EDUCATION

PhD, Animal Ecology lab., May 2017 – (expected) spring 2021
University of Greifswald, Germany. Supervisor: Prof. Klaus Fischer
Dissertation: “The areal expansion of the butterfly *Pieris mannii*”

During my PhD I studied the underlying factors promoting the unusually fast range expansion of a butterfly species (*Pieris mannii*) for which I

made use of a multi - methodological approach, comparing core and edge populations. This included:

- **Common garden experiments** to uncover potential differences in butterfly - host plant interactions and life-history traits
- **Physiological tests** to identify evolved vs. plastic differences in heat and cold tolerance in individuals growing up under different temperature regimes
- **Morphological measurement** to compare dispersal- related morphology
- **Species distribution models** (SDMs) to unravel the relative share of climate change to this species' range expansion.

Master of Science, Biodiversity, Evolution and Ecology, Dec. 2016

Free University of Berlin, Germany. Final grade: 1.5 (very good)

Thesis: "Age- and sex-specific parental effects on offspring growth and performance in a long-lived seabird, a longitudinal study"

Bachelor of Science, Environmental Science, Oct. 2014

Leuphana University of Lüneburg, Germany. Final grade: 1.7 (good)

Thesis: "The impact of drought on beech forests, influenced by nitrogen pollution and different regions of origin"

PROFESSIONAL EXPERIENCE

Internship, Evolutionary Ecology, September 2015 – December 2015

Leibniz Institute for Zoo- and Wildlife Research, Berlin, Germany

Topic: Movement ecology of foxes in urban areas. I was responsible for:

- Catching foxes and attaching radio collars to them
- Co-organizing the "urban fox" citizen science project

Fieldwork, Common tern colony, March 2016 – July 2016

Institute for Avian Research, Wilhelmshaven, Germany

In the course of my Master Thesis, I performed:

- Behavioral observations
- Chick ringing
- Colony checks

Working student, Bosse Consulting, Hamburg, May 2012- Nov. 2014
 Topic: “Conception and realization of a smart grid with storage components, based on renewable energies”. I was responsible for writing a project report to obtain additional third-party funding.

ACCEPTED MANUSCRIPTS

Neu, A., Beaulieu, M., Fischer, K. (2020): Limits on optimal decision making: host plant selection is not altered by high temperatures in a butterfly. *Animal Behaviour*

MANUSCRIPTS IN REVIEW

Neu, A., Lötters, S., Nörenberg, L., Wiemers, M., Fischer, K. Reduced host-plant specialization is associated with the rapid range expansion of a Mediterranean butterfly. *Journal of Animal Ecology*

MANUSCRIPTS IN PREPARATION

Neu, A., Fischer, K. Spatial variation in plastic cold but not heat-tolerance in a range expanding butterfly species (Manuscript drafted)

TEACHING EXPERIENCE (UNIVERSITY OF GREIFSWALD)

Supervision of laboratory and field courses:

- **Animal Ecology**, 2017-2018
- **Evolutionary Ecology**, 2017-2018

Workshop on species distribution modeling in R:

- **Theoretical ecology**, 2019

Supervision of Bachelor and Master students:

- Bianca Sorge (2018)
- Linda Nörenberg (2018-2019)

TALKS AND CONFERENCE CONTRIBUTIONS

Talk: “Host plant use in a range expanding butterfly species”

- DZG (German Zoological Society) meeting, 2019, Jena, Germany
- Zoological Institute Symposium, 2019, Greifswald, Germany

FURTHER TRAINING

- Physalia Course “**Ecological niche models in R**” - 2019, Berlin
- Summer School „**Genetic Adaptation**“ (RESPONSE) – October 2019, Hiddensee
- “**Good Scientific Practice**” (RESPONSE) 2019, Greifswald
- “**International mobility and research stays abroad**” 2019, Graduate School Greifswald
- “**Third-party funding for postdoctoral research projects**” 2019, Graduate School Greifswald
