Name

Richa SINGH

Gender

Female

Nationality

India

Emailrichas510@gmail.com**When did or will you finish your PhD?**

IISER MOHALI INDIA

City, state, and country of residence

Mandi, Himachal Pradesh, India

University education

Ph.D. (Biological Science) Indian Institute of Science Education & Research, Mohali, India;
Ph.D. Thesis: Examining the effect of environmental factors on acoustic signalling of a nocturnal ensiferan insect, *Acanthogryllus asiaticus*.

Advisor: Dr. Manjari Jain August, 2020

M.Sc. (Environmental Science) University of Allahabad, Allahabad, India 2013

B.Sc. (Botany, Zoology, Chemistry) Ewing Christian College, Allahabad, India 2011

What are your reasons for applying to be a Science Corps Fellow? (max. 200 words)

I am from India and I came to know about Science Corp for the first time. I really appreciate their major aim to develop scientific capacity in regions that lack access to STEM education. I understand the importance of spreading education worldwide especially in the STEM area. There are the following reasons because of which I would like to apply for it:

1. I finished my Ph.D. recently in August 2020, which makes me eligible to apply for it.
2. This is the opportunity which I have been looking for some time because it will provide me an experience to impart my knowledge which I have acquired in past years.
3. it is very interesting to teach and this will not only give me a chance to teach but also interact with students worldwide.
4. This will be definitely a learning experience for me which will be really helpful for my professional growth and development.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship (max. 200 words)

While doing Ph.D., I got the chance to mentor master students and interns in their research. This developed my problem-solving skill and provided me the experience to tackle their questions.

During the same time, I also worked as a teaching assistant for Animal Behaviour and Biostatistics course which provided me with various experiences from interacting with students to conducting exams and grading.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia

Expand on your selection above and describe where you imagine yourself professionally in the near (2 year) and long-term (10 year) future (max. 200 words)

I have recently finished my Ph.D. and want to gain experience with teaching. In the next to years, I imagine myself teaching students and get a post-doctoral position to enhance my research skill more. In the long-term, I see myself as an Academic scientist who does not carry out research but also teaches students. Teaching is something that I would like to do throughout my life. Educating students especially girls in STEM is a dream to me. I have been raised by a mother who never seen the face of school but she made sure I get the highest educational degree. It is my time to give back. I aim to become a faculty in university and promote STEM education
