

Evelina Blomberg

Address: Dorfstrasse 63, 8037 Zürich, Switzerland
Born: 16.05.1991
Nationality: Swedish
Phone.: +41 78 740 73 35
Email: evelinablomberg@hotmail.com

Research Experience

- Dec 2019 – present **PhD Student, University of Zürich, Switzerland**
Prof. Michael Weller's Group, Laboratory of Molecular Neuro-oncology
PhD thesis project: IFN- β treatment and PD-1 antagonism in syngeneic mouse glioma models. The thesis included systematic investigation of two immunological pathways commonly exploited and deregulated in brain tumors. Expected defence: June 2021
- Mar 2017 – Dec 2019 **Research Assistant, Karolinska Institutet, Sweden**
The Swedish National Pediatric Tumor Biobank
The biobank stores tissue from all kind of solid pediatric tumors. I received blood (from both patient and parents) and tumor biopsies/tissue from which DNA/RNA was extracted. Material and data were then stored in with special biobank softwares and will in the future be available as a resource for medical research.
- Jan 2016 – Feb 2017 **Research Internship, Karolinska Institutet, Sweden**
Prof. Monica Nistér's Group, Department of Oncology-Pathology
Master thesis project: "A glioblastoma model in genetically modified (PDGF-B/p53 null) mice: Studies on NSC differentiation in the pre-neoplastic brain". The master thesis received highest grade. Further studies were pursued to understand additional molecular mechanisms of the transgenic mouse model developing glioma tumors.
- Aug 2015 – Jan 2016 **Research Internship, Osaka University, Japan**
Prof. Katsuto Tamai's Group, Department of Stem Cell Therapy Science
A six-month internship during my master exchange semester. I was investigating the *in vivo* mechanism of which endogenous recruited mesenchymal stem cells enhance wound repair in skin-transplants and skin fibrosis.
- Summer 2015 **Summer Internship, Stockholm University, Sweden**
Prof. Siamak Haghdoost's Group, Department of Molecular Bioscience
A 10-week summer traineeship with my own research project: "Comparing DNA-repair kinetics of VH10 cells from early to late passage" where repair kinetics of double stranded breaks of one cell line at different passages were compared.
- Jan 2014 – Jan 2015 **Research Internship, Karolinska Institute, Sweden**
Prof. Lars Åhrlund-Richter's Group, Department of Women's and Children's health
Bachelor's thesis project with a prolonged contract for an additional 6 months' employment: "Therapy response of neuroblastoma to Doxorubicin in a homologous *in vivo* model" where therapy responses in a humanized animal model was investigated.

Education

Dec 2019 – present	Cancer Biology PhD program, Life Science Graduate School, Switzerland PhD level courses in cancer development and cancer cell survival mechanisms. Transferrable skills courses in presentation technique, voice training, project management and scientific writing were also taken. 275h of teaching, both basic and advance courses in biology was done.
Sep 2014 – Jun 2016	Master's Program in Biomedicine, Karolinska Institutet, Sweden Advanced courses in for example Bioinformatics, Biostatistics and current translational research. The translational research course included modules such as oncology and neuroscience but with a common emphasis on immunology. Two practical placements with laboratory work. Of graded courses, more than 85% received highest grade.
Aug 2015 – Jan 2016	Exchange Semester, Osaka University, Japan PhD course: Interdisciplinary Biomedical Science 1. Contrast and cooperation between the immune system and the nervous system 2. Stem cells and regenerative medicine 3. Advanced imaging techniques opening windows on integrated biomedical systems
Sep 2011 – Jun 2014	Bachelor's Program in Biomedicine, Karolinska Institutet, Sweden Basic courses in a large diversity of topics, varying from organic chemistry to immunology and molecular oncology. Provided a solid platform for continued studies.

Activities and volunteering

Mar 2019 – present	Student representative, Cancer Biology PhD Program, University of Zürich As a student representative, I represent the students' voice in the steering committee of the Cancer biology PhD program: Furthermore, I organize annual social events for the students of the program to connect and exchange experiences and ideas.
Sep 2014 – Aug 2019	Volunteer, Stockholms Stadsmission, Sweden Volunteer for Stockholm Stadsmission, which is a nonprofit organization working towards a more humane society. I helped refugee children that came alone to Sweden with their homework.
Sep 2012 - Jun 2013	Business committee, Medicinska Föreningen, Karolinska Institutet, Sweden I was an active member of the Business committee as it started up again in 2012. Facilitating a natural meeting point and act as a mediator between the students of the university and the industry.

Other work experience

Apr 2012 - May 2014	Costumer service agent Marginalen Bank, Stockholm
Oct 2005 – Mar 2010	Figure skating teacher Figure skating club of Djursholm, Danderyd

Languages

Swedish	Mother tongue
English	Fluent in oral and written
Spanish	Basic oral and written
German	Basic oral and written
