To: fellows@science-corps.org

Name

Sandra Rizk

Gender

Female

Nationality

Egyptian

Emailsandra.r.hassan@gmail.com**When did or will you finish your PhD?**

I'll submit my thesis by the 15th of March, and hopefully defend by June.

City, state, and country of residence

Dresden, Saxony, Germany

University education

PhD | Bacterial Membrane Biology | B CUBE, TU Dresden | 11.2016 – present
Participation | Microbial Diversity Course | MBL, Woodshole | Summer 2018
M. Sc. | Molecular Bioengineering | Biotec, TU Dresden | 10.2014 – 01.2016
B. Sc. | Biotechnology | German University in Cairo | 09.2009 – 07.2013

What are your reasons for applying to be a Science Corps Fellow? (max. 200 words)

I was the kid that sat at the back seat of her parents' car enthusing about how the digestive system worked, a passion that only grew as I learned more about science. I feel very privileged to have had the opportunity to follow my passion for science, get the education I got and pursue a career in research. An opportunity which is rather scarce for people from third world countries like me. Consequently, I am always very keen on any form of science

outreach, even more so when it's aimed at less privileged communities. That's why I was super excited to learn about science Corps, because it is everything that I believe in.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship (max. 200 words)

Before my senior year as an undergrad in Egypt, one of my professors saw how keen I am about research and nominated me for a summer internship at the University of South Florida. When I came back I wanted to transfer my knowledge and let my colleagues know that research isn't impossible! I started a workshop called "Biotech Pioneers" as an extracurricular activity for pharmacy students to introduce them to biotech concepts, basic research and we also had weekly journal clubs. After I graduated I tutored Biology to high school students while I applied for Master's programs abroad, and as science outreach is my passion I established our lab's booth at the "Long Night of Science" in Dresden (an event that opens the doors of research institutes to the public to explain in simple words and experiments the research scene).

Where do you imagine yourself professionally in the future? Check all that apply.

Doing science in industry
In science education
In science outreach

Expand on your selection above and describe where you imagine yourself professionally in the near (2 year) and long-term (10 year) future (max. 200 words)

In 2 years I see myself in a career in industrial Biotechnology with a lot of experience to bring back to Egypt, have a stable job and start a new location for Science Corps on the side. In 10 years, I would like to expand the scope of the Science corps location from only reaching schools in the area to schools all over Egypt, and to be able to offer the highly enthusiastic students internships in Egypt or abroad.
