marta-pao@hotmail.it
Nationality: Italian
DOB 15.03.1992

Experience

- UniversitätsSpital Zurich and University of Zurich, Department of Dermatology - Zurich, Switzerland** *Sept 2018 – Present*
Phd student in Microbiology and Immunology, Life Science Zurich Graduate School
Development of passive immunotherapy for the treatment of peanut allergy. Therapeutic peanut-specific human antibodies for passive immunization are cloned from human patients and their function is tested in *in vitro* and *in vivo* models in order to select lead clinical candidates with superior affinity toward prevention of anaphylactic reactions.
✓ Winner of Swiss Government Excellence Scholarship
- International School for Advanced Studies (SISSA) - Trieste, Italy** *Feb 2017 – March 2018*
Post-graduate fellow
Optimization of an *in vitro* aggregation assay for the early detection of Parkinson's and Lewy Body diseases starting from the production and purification of large amounts of highly pure recombinant α -synuclein protein.
✓ Winner of SISSA post-graduate grant.
- UniversitätsSpital Zurich, Institute of Neuropathology - Zurich, Switzerland** *Mar 2016 – Oct 2016*
Master's thesis fellow
Investigation of the role of the microglial signal regulatory protein α (SIRP α), a crucial modulator of host cell phagocytosis, in a mouse model of prion disease.
✓ Winner of Trieste International Mobility grant.
- Department of Biology and Biotechnology 'L.Spallanzani'- Pavia** *Nov 2013 – May 2014*
Bachelor's thesis fellow
Identification of ion channels and transporters involved in Ca²⁺ signals genesis in human umbilical vein endothelial cells (HUVEC).

Education

- Phd – Microbiology and Immunology** *Sept 2018 – Present*
University of Zurich
- International MSc - Neuroscience** *Oct 2014 – Dec 2016*
University of Trieste
Grade: 110/110 cum laude. Experimental thesis: *Prion pathogenesis in mutant mice for the signal regulatory protein alpha (SIRP α).*
- BSc - Biotechnology** *Oct 2011 – July 2014*
University of Pavia
Grade: 103/110. Thesis: *The role of Ca²⁺ in pulmonary hypertension.*
- High school graduation** *Sept 2006 – July 2011*
'Liceo Scientifico Sperimentale Leonardo'
Grade: 83/100. Specializing in Languages.

Publications

- PLoS One. 2017 May 17;12(5):e0177876. doi: 10.1371/journal.pone.0177876. eCollection 2017.
Prion pathogenesis is unaltered in the absence of SIRP α -mediated "don't-eat-me" signaling.
Mario Nuvolone, Marta Paolucci, Silvia Sorce, Veronika Kana, Rita Moos, Takashi Matozaki, Adriano Aguzzi.
- Amyloid. 2017 Mar;24(sup1):36-37. doi: 10.1080/13506129.2017.1289913.
Extended characterization of the novel co-isogenic C57BL/6J Prnp^{0/0} mouse line.
Nuvolone M, Sorce S, Paolucci M, Aguzzi A.

Languages

Italian Mother tongue English fluent Spanish fluent German good

Extra

- English courses abroad (UK, US, Australia).
Trieste next volunteer. Travelling. Playing the piano.
Teaching activities.
