

Apply for a Science Corps Fellowship - Entry #664

Name
Kudakwashe Dandajena
Email
kudadandaz@gmail.com
Gender
Male
City, state, and country of residence
Kigali
Nationality
Rwanda
When did or will you finish your PhD?
September 2022
University Education
The University of the Western Cape., South Africa
What are your reasons for applying to be a Science Corps fellow?
I am also passionate about scientists teaching and building STEM capacity worldwide
In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.
strongly believe that the competitiveness of any institution, nation or individual is measured by the weight of scientific investment in frontier disruptive technologies fueled by big data. Artificial Intelligence (AI) especially with a focus on deep learning driven by immersing in High-Performance Computing (HPC) power has our future, and it has the supremacy to transform inefficient and ineffective health, transportation, mining, education, industry, business, and manufacturing systems. I personally consider that the convergence of multiple technology tiers and their migration from in vitro (in research laboratories) to in vivo (in everyday lives) has managed to transform our daily business and scientific approach. Any data science-driven decision research through optimized of algorithms will certainly provide early detection capabilities towards reducing the impact of global pandemics, endemics, economic shocks and many other. The 4th industrial revolution that is currently fueled by big data, supercomputers, and other disruptive technologies has changed the way in which modern industry and business operations. Industries, businesses and institutions that are applying these trending technologies will remain competitive forever.

Where do you imagine yourself professionally in the future? Check all that apply.

Doing science in industry

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

I look forward to becoming a new generation of technology with applied expertise that will shape technological investment vision on how global citizens can leverage critical tech platforms toward ensuring sustainable economic growth. I am very confident that participating in a research program under your supervision will avail me of endless and exciting knowledge opportunities. It will also avail me of valuable experience that will suit my goal of becoming at least a renowned global scientific research driver
