

Apply for a Science Corps Fellowship - Entry #703

Name
Jose Velasquez
Email
jose.velasquez.carmona@correounivalle.edu.co
Gender
Male
City, state, and country of residence
Cali, Valle, Colombia
Nationality
Colombiano
When did or will you finish your PhD?
Dec-17-2021
University Education
Bs in Chemistry, Doctor in Science-Chemistry, specialized in Physicalchemistry
What are your reasons for applying to be a Science Corps fellow?
I have been interested and immersed in education in sciences and math for high school and college levels since I finished my Bs in chemistry. My strategies to teach involve the use of technological platforms and contrasting with lab experiences, making it easier for the students to understand matter, its properties, and also its quantification. Respect, enthusiasm, and creativity are the three most representative attributes of myself, besides intelligence and professionalism.
In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.
In the last seven years, I have had the opportunity to explore and develop pedagogical knowledge to teach science (biology, physics, and chemistry) since in my last jobs there were different training sessions for virtual and mainly presential education modalities. In these courses, I learned about different skills students must get and the manners they can achieve different goals.
Where do you imagine yourself professionally in the future? Check all that apply.
Academic scientist in academia Doing science in industry

In science education

In science outreach

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

My purpose in the near-term consists of exploring my scientific and pedagogical aptitudes with postdoctoral fellows, and also getting a position in a university as a professor. In the long-term, I expect for being a researcher group director in supramolecular and material science, encouraging students a passion for researching.
