

Apply for a Science Corps Fellowship - Entry #804

Name
Elizabeth Hynes
Email
elizabethhynes@gmail.com
Gender
Female
City, state, and country of residence
Den Haag, the Netherlands
Nationality
Ireland
When did or will you finish your PhD?
2018
University Education
PhD Swansea University UK BSc First Class Hons UCD Ireland
What are your reasons for applying to be a Science Corps fellow?
To gain experience with teaching and developing curriculum streams. My goal is to become a tenured academic and teaching is a huge part of giving back as a scientist. I have some experience teaching maths and physics already and enjoy working with social issues too so a fellowship in a foreign country is an ideal challenge for me.
In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.
I taught evening classes in maths in 2011 and 2016. I taught laboratory techniques in 2017. During my career as a patent attorney I learned a vibrant and persuasive way to present technical information spoken and written.
Where do you imagine yourself professionally in the future? Check all that apply.
Academic scientist in academia In science education In science outreach
Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

I wish to apply for post doctorate positions after the fellowship and then to apply for a tenure track role once I have sufficient experience.
