

Apply for a Science Corps Fellowship - Entry #600

Name
Reynand Dumala-on
Email
reynandcpc@gmail.com
Gender
Male
City, state, and country of residence
Hsinchu, Taiwan
Nationality
Filipino (Philippines)
When did or will you finish your PhD?
in 2025
University Education
University of Auckland, New Zealand
What are your reasons for applying to be a Science Corps fellow?
I am a teacher by profession, and this fellowship will significantly enhance my understanding of the world's curriculum and apply it upon return.
In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.
I have been teaching for 14 years cumulatively in the United States, the United Kingdom, the Philippines, and Taiwan. I teach all classes of science all the way from middle school or Key Stage 3 to high school or Key Stage 4 and 5, undergraduate and doctoral levels. I also have a relevant and competitive background, especially in Science, Technology, Engineering, and Mathematics (STEM) areas. I have been trained as well in dealing with students under special service or mainstreamed self-contained in my regular science class. I also have a strong familiarity in terms of a multicultural classroom setting, handling challenging students and demotivated ones. I am also trained in how to teach a standards-based curriculum and effective classroom management. I am also involved in coaching high school students in academic challenge (State Quiz) and Intel-International Science and Engineering Fair (Intel-ISEF) in the United States in which we gained awards as well. In 2019, I received an award for Teaching Excellence in New York, United States.
Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia
In science education
In science outreach
As far as possible from science/education

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

I want to see myself focused in science education (teaching and curriculum design), STEM, and research opportunities, both in the classroom and outside the classroom to reach the underprivileged for equity's sake.
