

Apply for a Science Corps Fellowship - Entry #1130

Name
Karina Aquino
Email
karminaaquino@gmail.com
Gender
Female
City, state, and country of residence
Zürich, Switzerland
Nationality
Filipino
When did or will you finish your PhD?
December 2022
University Education
• Doctoral candidate in Geology; 2018-present; expected graduation: December 2022; Department of Earth Sciences, ETH Zürich (Swiss Federal Institute of Technology), Switzerland • Master of Science in Geology; 2013-2018; National Institute of Geological Sciences, University of the Philippines (UP NIGS), Diliman, Quezon City • Bachelor of Science in Geology; 2009-2013; National Institute of Geological Sciences, University of the Philippines (UP NIGS), Diliman, Quezon City
What are your reasons for applying to be a Science Corps fellow?
I was teaching at the university while I was doing my master's and I really enjoyed it. Teaching is a difficult but very fulfilling job and I want to continue along this path in my career. In fact, my main motivation for doing the Ph.D. is to be able to return to the Philippines to teach. I was thrilled to learn about the Science Corps program as it perfectly fits my personal career goals.
In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.
I taught at the University of the Philippines for more than four years before the Ph.D. I also volunteered as a mentor to the GradMap Philippines program to guide aspiring Filipino STEM students in their graduate school applications.
Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia
Doing science in industry
In science education
In science outreach

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

I would really like to teach in the Philippines (not just anywhere) as I experienced firsthand the struggles of being a STEM student in the Philippines. I plan to apply to teaching positions in the university or high school (part-time or full-time) and maybe do research in a government organization (Department of Science and Technology) or perhaps do research in partnership with the industry.

How did you find out about Science Corps?

Facebook
A friend or colleague

Any other comments/questions?

I am expected to finish my Ph.D. this year and I am interested to be a fellow sometime in April 2023 in the Philippines. I really like this initiative and would be interested in helping develop a new site in the Philippines or even having a mobile site.
