

Apply for a Science Corps Fellowship - Entry #2223

Name
Andrew Earl
Email
andrew.earl45@gmail.com
Gender
Female
City, state, and country of residence
Auckland, New Zealand
Nationality
New Zealand
When did or will you finish your PhD?
August 31st
University Education
Doctor of Philosophy - Chemistry - University of Auckland - Thesis handed in August 31st, awaiting defence. Bachelor of Science (Honours) - Obtained in 2017
What are your reasons for applying to be a Science Corps fellow?
Firstly, I enjoy teaching. I enjoy science communication. I really enjoyed the opportunities I had to teach while I was studying for my PhD, and I am considering going into education in the future. I also had the opportunity to do science outreach as part of BASF Kidslab, which was another very positive experience. However, to be completely honest I am also interested more specifically in working in the Philippines as my girlfriend is currently studying there. I would really like to join her there for a while to help support her.
In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.
I have four years of teaching experience as a graduate teaching assistant, at the end of which I was entrusted with the preparation of teaching materials. Additionally, I have done science outreach with BASF Kidslab, which gave me an opportunity to inspire younger students to enjoy science.
Where do you imagine yourself professionally in the future? Check all that apply.

Doing science in industry
Administrative role in industry or academia
In science education
In science outreach

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

I'm currently torn between whether I wish to pursue an industry career or an educational career. I'm feeling quite strongly that I'm done with lab work, and I think that I am looking for a change of pace. I'm hoping that a Science Corps Fellowship will help me to decide whether or not teaching is truly my calling.

How did you find out about Science Corps?

Other

Any other comments/questions?

I'm hoping for a Philippines placement, as this will place me near my girlfriend. If there is an available spot in the Quezon City area, or somewhere in Metro Manila, I would be absolutely overjoyed.
