PERSONAL STATEMENT

I am a recent PhD graduate with experience safely handling a range of hazardous chemical and biological materials, including experience working under PC2 conditions with GMO microbial samples. During my PhD I have also developed my problem solving, project design, critical thinking, and technical writing skills. Furthermore, I developed my science presentation skills with audiences of all skill levels, which will assist with outreach to both lay-person and scientific stakeholders.

I am passionate about science communication and have four years of experience working as a graduate teaching assistant for the University of Auckland. This has recently included preparation of teaching materials and laboratory coordination responsibilities working as part of a team of senior graduate teaching assistants, which has allowed me to further develop my communication skills and eye for detail.

In my off time I enjoy weightlifting at the gym, as well as designing and building projects such as using Blender to design 3d-printable models for myself and friends to use as game or art pieces.

TECHNICAL SKILLS

- Safe handling of hazardous chemical material (experienced with Classes 1-6, 8, and 9)
- Technical and scientific writing and presentation.
- Synthesis and characterisation (including NMR, IR, and Mass Spec. analysis) of organic compounds.
- Use, troubleshooting, and repair of laboratory equipment.
- Blender – Design and preparation of STL files for 3d printing..
- Experienced with Microsoft Office

PERSONAL SKILLS

- Self-management and responsibility
 - Willingness to learn
 - Problem solving
 - Communication
 - Teamwork
 - Leadership
-

WORK HISTORY

University of Auckland

2018-present

Graduate Teaching Assistant

- Preparation of teaching and marking guides
- Laboratory coordination and administration
- Assisting with preparation of lab instructions
- Working as part of a team of senior GTAs

- Clear communication of laboratory hazards, experimental instructions, and chemistry knowledge to undergraduate students
- Data management

QUALIFICATIONS

University of Auckland
2018-2022

Doctor of Philosophy
Brimble Research Group

University of Auckland
2015

Summer Research Scholarship
Wiles Research Group

University of Auckland
2014-2017

Bachelor of Science (Honours)
Brimble Research Group

PUBLICATIONS

- Earl, A; Li, F; Furkert, D; Brimble, M. Synthesis of the [7,6]-Spirocyclic Ring Fragment of 13-Desmethyl Spirolide C, Org. Biomol. Chem. - *under preparation*

OTHER ACHIEVEMENTS

- Associate Investigator – “Asymmetric Construction of the Spirocyclic Imine Motifs of Potent Marine Toxins - Developing a General Access to the Active Pharmacophore” – PBRF grant 2021 (Primary Investigator – Dr Freda Li)
- Best Two-Minute Presentation – SCS Research Showcase 2019
- Associate Investigator – “New Methods to Construct the Tetrahydrofuran Core – Develop a General Access to Natural Marine Toxin Gymnodimine A” – PBRF grant, 2018 (Primary Investigator – Dr Freda Li)
- BASF KidsLab Demonstrator, 2018 and 2019.

REFEREES

Dame Margaret Brimble
Distinguished Professor
University of Auckland
