

Apply for a Science Corps Fellowship - Entry #2110

Name
Olusegun Peter Adesuyi
Email
adesuyiolusegun@gmail.com
Gender
Male
City, state, and country of residence
Lagos
Nationality
Nigeria
When did or will you finish your PhD?
3 years
University Education
University of NOTRE DAME (in process) B.A /soil science/ Obafemi Awolowo University/ graduated January 2012.
What are your reasons for applying to be a Science Corps fellow?
To source for tuition fee, and to get an application fee wavier.This would really help me in concentrating on my research studies in my studied.At the university of NOTRE DAME,a student does not have to have his /her masters before enrolling for his PhD as long as you are conferred with a good undergraduate degree, with this information,i have applied for my PhD in Biological sciences(ecology,evolution and environment).
In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.
My practical work with my lectures during their PhD research and with other science voluntary research work in Nigeria,teaching younger generation in sciences and science related subjects, and also taking it to the field for the farmers for better yield of agricultural produce.This had made me to know the importance of science better, and thereby preparing me for science corps fellowship.
Where do you imagine yourself professionally in the future? Check all that apply.
Academic scientist in academia In science education In science outreach

As far as possible from science/education

Other

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

I would practically be a science lecturer and practically into environmental sustainability, in agriculture to solve the present food crisis in the world so that food can come cheap for the poor and everyone in Africa, Asia, Europe or any part of the world would go to bed hungry. Food can still go round, and everyone on earth should be able to afford quality 3 square meal. With continuous research, into biological sciences, our environment should be able to give us good source of water in the next 10 years

CV/Resume
