When did or will you finish your PhD?

05.03.2020

University Education

PhD- Mechanical Engineering- University of Calicut, Kerala/ Government Engineering College Thrissur- 05.03.2020

MTech- Production Management- Visvesvaraya Tech. University, Karnataka/ BVBCET Hubli- June 2010

BTech- Mechanical Engineering- University of Calicut, Kerala/ Al Ameen Engg. College Shoranur- June 2007

What are your reasons for applying to be a Science Corps fellow?

During my master's and doctoral projects, I had industrial experiences in the process and quality improvement of firms. I have been working as an academican in the engineering field for the last 13 years. One of my research interests is the application of Total Quality Management concepts in the education sector. During my career, I have been assigned with question paper setting, syllabus setting, outcome based education trainings, etc. I had or have been in various mentoring and administrative roles, which improved my leading and organising skills. I took on roles such as academic auditor and

co-coordinator for accreditations and academic quality improvement processes at the institutions. All these will surely help me to work with you as a Science Corps Fellow.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.

My experience as an academician, mentor, researcher, academic auditor, and administrator, (course delivery planning and executing, question paper setting, syllabus setting, mentoring/ advising students/ parents, giving consultations to industries/ academic institutions) will act as a strong pillar for my career as a Science Corps Fellow.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia

Doing science in industry

Administrative role in industry or academia

As far as possible from science/education

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

I am constantly trying to add my experiences through different opportunities, which will help improve my teaching methods. I look forward to receiving the funded research from various organisations and industries. I wish to work in various roles or positions of academia so that I can use my experience in contributing to the development of quality teaching and learning processes.

How did you find out about Science Corps?

Other

Any other comments/questions?

I wish to know more about the job profile. Is it a full time job or a part time job? Will the travel be within the country or abroad? If I am chosen, when would I need to join?
