

Apply for a Science Corps Fellowship - Entry #3212

Name

Hilary Frank

Emailhilaryfrank@yahoo.com**Gender**

Male

City, state, and country of residence

Bristol

Nationality

Nigerian

When did or will you finish your PhD?

Submitted my thesis in march 2023

University Education

University of Bristol - PhD Electrical and Electronic Engineering

Oxford Brookes University - MSc. Mobile and High Speed Telecommunication Networks

University of Port Harcourt - BSc. Computer Science & Mathematics

What are your reasons for applying to be a Science Corps fellow?

To extend my international experience and contribute to global development.

I have always been interested in experiencing different cultures and teaching internationally would allow me to immerse myself in a new environment while also sharing my expertise with students from diverse backgrounds.

Also I believe that globalization is an increasingly important aspect of our world, and teaching internationally would give me the chance to contribute to this movement by fostering cross-cultural communication and understanding among students.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.

I have been a lecturer at Polytechnic in Nigeria before travelling to the UK for graduate studies. Therefore, i have background in teaching and learning and would want to further enhance this skills while i also impact knowledge to people across the world.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia

Administrative role in industry or academia

In science outreach

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

I am currently a staff of the University of Bristol as a Research Associate. Within the next two years i would be within academia and continue to collaborate/contribute to educational development in the long term even in a situation where i find myself in industry.
