

Apply for a Science Corps Fellowship - Entry #3213

Name

Delanyo Kulevome

Email

kdelanyo@ieee.org

Gender

Male

City, state, and country of residence

Huzhou, Zhejiang Province, China

Nationality

Ghanaian

When did or will you finish your PhD?

Dec. 2023

University Education

Ph.D., Information and Communication Engineering, University of Electronic Science and Technology of China (UESTC), Dec. 2023

M.Eng., Electronic Science and Engineering, UESTC, Jul. 2019

B.Eng., Electrical/Electronic Engineering, Accra Institute of Technology, May. 2017

HND, Electrical/Electronic Engineering (Telecommunication), Aug. 2009

What are your reasons for applying to be a Science Corps fellow?

I am applying to be a Science Corps fellow because I am passionate about engineering and education. I believe Science Corps is an excellent opportunity to use my skills and experience to impact the world positively. I have always been fascinated by engineering, and I'm passionate about education. Everyone should be able to learn about engineering regardless of their background or circumstances. As a Science Corps fellow, I would have

the chance to work with students in underserved communities and inspire them to pursue careers in science. I would also learn about these communities' challenges and develop solutions to help them thrive. I am confident that I have the skills and experience necessary to be successful in a Science Corps fellowship. I am a hard worker, dedicated to my studies. I am also a good communicator and can work well with others. I am excited about the opportunity to be a Science Corps fellow, and I am confident that I can positively impact the world and inspire others to pursue their dreams in science and engineering.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.

In addition to my studies, I have had many relevant experiences that have prepared me for a Science Corps fellowship. These include:

Research Experience: I have conducted research in a variety of fields. This experience has given me the skills and knowledge necessary to conduct independent research and solve complex problems.

Teaching Experience: I have taught various courses at various levels informally. I learned how to clearly and concisely communicate complex scientific concepts, which is easy for students to comprehend.

International experience: I have worked and studied in different countries. This international experience has given me a global perspective and helped me develop the skills to work with people from different cultures.

I am confident that my skills, knowledge, and experience would prove valuable to the Science Corps fellowship. I am convinced that I can significantly contribute to the Science Corps program and the communities I serve and positively impact the lives of others. In addition to the above, I am also hard-working, willing to learn new things, and always ready to help others.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia

In science education

Other

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

In the near future, I see myself in academia, teaching and mentoring young students to achieve their dreams and full potential. I am particularly interested in the field of artificial intelligence, and I believe that AI has the potential to revolutionize many aspects of our lives. I want to be a part of that revolution and use my skills to positively impact the world, solve engineering problems, and develop AI tools to aid engineering education.

In the long term, I see myself working as a research scientist in AI research and education. I want to develop new AI technologies that can solve real-world engineering problems in engineering and engineering education. I believe AI's application in engineering can improve the world, and I want to be a part of that.

I am confident I can achieve these goals with hard work and dedication. I am excited about the future and eager to make a difference.
