

## Apply for a Science Corps Fellowship - Entry #3214

**Name**

Amabile Manianga

**Email**[amabilemanianga@yahoo.com](mailto:amabilemanianga@yahoo.com)**Gender**

Female

**City, state, and country of residence**

Livingstone, Zambia

**Nationality**

Zambian

**When did or will you finish your PhD?**

August 2024

**University Education**

1. Degree : PhD Sustainable Development

Subject : Studying under school of Biotechnology (focusing on value addition to underutilized plant products through phytochemical analysis and their beneficial application)

Institution: Amrita university, India

Date expected: August 2024

2. Degree: masters

Subject: Biology with education

Institution: DMI St Eugene University, Zambia

Obtained: 05/10/2019

3. Degree: Bachelor of Science Degree  
Subject: Biology major, Chemistry minor  
Institution: Kwame Nkrumah University, Zambia

**What are your reasons for applying to be a Science Corps fellow?**

Biology is a major course I undertook while pursuing my master's degree while for my bachelor of science degree I studied biology and chemistry. I am currently pursuing a PhD in sustainable development under school of biotechnology were am focusing on value addition to underutilized plant products through phytochemical analysis. Given an opportunity to be part of the science corps, I will work hard as I have done before to impart science knowledge to the learners at all levels of education. I am flexible in working alone as well as working with other people as a team, to learn and share knowledge. I wish to adapt to whatever challenges I will come across in order to meet the expected standards.

**In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.**

A career in science calls for team work for one to learn more. Am a teacher by profession with more than 10 years experience. I have interacted with others at school level during continuous professional development meetings and also at national level during science education conferences where we share knowledge to improve our understanding in the teaching of science.

**Where do you imagine yourself professionally in the future? Check all that apply.**

Academic scientist in academia  
Doing science in industry  
In science education  
In science outreach  
As far as possible from science/education

**Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.**

I see myself working in the lab as a scientist trying to discover new beneficial compounds from plant products. While doing my lab work, I also imagine myself working and teaching the young people in the science pathway helping them to reach their goals and attain their dreams.

**CV/Resume**
