

Apply for a Science Corps Fellowship - Entry #3221

Name

Kartikeya Walia

Emailn0781786@my.ntu.ac.uk**Gender**

Male

City, state, and country of residence

Nottingham, United Kingdom

Nationality

Indian

When did or will you finish your PhD?

June 2023

University Education

PhD| Robotics and Additive Manufacturing| Nottingham Trent University | June 2023

B.E. | Mechanical Engineering | Panjab University | August 2018

What are your reasons for applying to be a Science Corps fellow?

I am inspired by the opportunity to share my knowledge with keen pupils. My expertise in design and robotics can be demonstrated and explained very simply and I will be more than elated to share my skills and learn from this experience as well.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.

I have taught undergraduate students at the university as an hourly paid lecturer. This experience made me understand the importance of inclusivity while teaching as the students can have different level of understanding. Also, previously I have visited AISEC in SAMARA for an internship 'Young and Prospective' where I was involved in sharing knowledge, culture and team building projects with school students.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia

Doing science in industry

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

In the near future, I am relatively open to academia and industry to gain some professional experience in robotics and additive manufacturing research. In long term, I see myself either running a research group in the field of sustainable design approaches and optimising the current hardware solutions and I am particularly passionate about starting and managing a maker space where I would like interested students to come and pursue projects and I will be available to help and impart my expertise in any manner that benefits them. This will help to ignite interest towards research and probably inspire some future scientists.
