

Apply for a Science Corps Fellowship - Entry #3222

Name

Adrian Sulich

Emailsulich@ifpan.edu.pl**Gender**

Male

City, state, and country of residence

Warsaw, Poland

Nationality

Polish

When did or will you finish your PhD?

the last PhD (physics): 2020

University Education

PhD, Solid State Physics, Institute of Physics PAS (IP PAS), 28.05.2020

PhD, Chemistry, Institute of Nuclear Chemistry and Technology (INCT), 18.12.2019

MSc in Engineering, Chemical Technology, Faculty of Chemistry, Warsaw University of Technology, 09.07.2008

PhD, Linguistics, Faculty of Modern Languages, University of Warsaw, 23.01.2007

MA, Polish Philology, Faculty of Polish Studies, University of Warsaw, 28.06.2000

What are your reasons for applying to be a Science Corps fellow?

I would like to help with a science and teaching development in the host location, offering my interdisciplinary education and professional experience.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.

During my studies and professional work I gained experience in participation in international research project (Actinide reCykling by SEParation and Transmutation FP7 Collaborative Project 211267), in a collaboration with international teams and in living abroad (during two fellowships: at Rostock Universität in Germany, 3 months, and next at Chalmers University of Technology in Sweden, 1 month), as well as in teaching activity and popularization of science (I participated in numerous science communication events organized by Institute of Nuclear Chemistry and Technology and by Institute of Physics PAS).

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

I imagine myself in the near future (~2 year) working as a post-doc fellow in a foreign scientific institution to start new international collaboration - it is a typical stage after a doctoral defense to develop the scientific career. In longer term I would like to start to develop my own scientific projects (as a Principal Investigator).
