

Apply for a Science Corps Fellowship - Entry #2867

Name

James Dowling-Healey

Email

dhloris11@yahoo.com

Gender

Male

City, state, and country of residence

West Hartford

Nationality

United States

When did or will you finish your PhD?

MS- 2022, JD- 2015

University Education

BA, Bates College. Political Science.

JD, The University of Maine School of Law. Law.

MS, The University of Saint Joseph. Biology

Graduate Certificate, The University of Saint Joseph. Environmental Science.

What are your reasons for applying to be a Science Corps fellow?

Dear Science Corps,

My name is James Dowling-Healey and I would like to be a Science Corps Fellow.

I have experience working as an adjunct faculty member at The University of Saint Joseph, where I taught the lab portion of Earth Science, Principles of Environmental Science, and Principles of Environmental Health. Principles of Environmental Science consisted mostly of outdoor field work, while the other courses were mostly taught indoors. At the University of New Haven I taught the classroom portion of two sections of Biology 2253: Molecular Basis of Life. That course covered a variety of topics including biomolecules, photosynthesis, cellular respiration, cell structure and function, gene expression, and cell division. I taught and supervised students, proctored exams, and graded assignments.

Some topics required much more detailed lectures than others, depending on the students' familiarity with the subjects covered that day or the level of difficulty of a particular experiment. I taught diverse students from a range of backgrounds, and those students had varying levels of comfort with science.

I possess a Bachelor of Arts in Politics from Bates College, a Juris Doctor from The University of Maine School of Law, a Graduate Certificate in Environmental Science from The University of Saint Joseph, and a Master of Science in Biology from The University of Saint Joseph.

My interests in biology are varied, but I am especially interested in zoology and ecology. I would be happy to be involved not only with classroom lectures, but with hands-on projects like fieldwork, laboratory work, or trips to local zoos and museums. I would be thrilled to assist permanent faculty with instruction or research, and I enjoy teaching undergraduates.

My history with biology reaches back many years and includes community outreach and collaborations with zoos, museums, and universities. I would be happy to discuss my background in more detail, and look forward to answering any questions you may have.

Thank you for your consideration.

Sincerely,

James T. Dowling-Healey

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.

I have taught at two universities, and I have written a field guide, animal fact sheets, lectures, and local TV specials. I have worked with multiple organizations including museums, nature centers, zoos, government agencies, universities, schools, clubs, non-profits, and businesses.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia

Doing science in industry

In science education

In science outreach

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

I believe I will be working primarily as a government or industry scientist, while continuing to work as an adjunct professor.
