

CURRICULUM VITAE

Kueshi Sémanou DAHAN

kueshisemanouda2059@uds.edu.gh / dkueshi09@gmail.com

Green Climate Ambassadors for Africa 2020, Climate Ambassador (Global Youth Climate Network - GYCN, World Bank's Youth-to-Youth Community) 2021 and One Planet Fellowship award 2019; Alumni Lojic 2021 (<https://community.awardfellowships.org/kueshi.dahan/about>)

Personal data

Full name: Kueshi Sémanou DAHAN

Date and place of birth: 03/05/1987, Ahlon-tinipe, Republic of Togo

Sex: Male

Country of citizenship: Republic of Togo

Working languages: French, English

Education

- 2020: MASTER II at CEA-CCBAD (African Excellence Center on Climate Change, Biodiversity and Sustainable Agriculture) of Felix Houphouet Boigny University (Ivory Coast): fire, vegetation cover dynamics and climate change in the forest-savanna contact zone forest-savanna contact zone: case of the of Toumodi department in central Ivory Coast
- 2018: Master in Plant Biology at Felix Houphouet Boigny University (Ivory coast.)
- 2016: Master in physical geography; University of Abomey Calavi) Supervisor: **Prof Imorou-Ismaila TOKO**.
- 2011-2012 Bachelor of Geography: UAC (University of Abomey-Calavi)
Academic research: society and climate risk management on the Abomey plateau (keywords: society, risk, climate), supervisor: **Prof Euloge OGOUWALE**.
- 2010-2011: DUEL in Geography UAC (University of Abomey-Calavi); University research: Sub-Saharan Africa: crises and changes in agriculture (keywords: crises, mutation, crises and changes in agriculture), supervisor: **Prof Vincent OREKAN**.
- 2008-2009: Baccalaureate series D, Togo (lomé)

Current situation

- PhD Student at WACWISA (West African Centre for Water, Irrigation and Sustainable Agriculture)
Thesis research: **Fire, vegetation cover dynamics and climate change in Ghana: case of guinea-savanna and forest-savanna mosaic zones.**

Research interests

My research fields are forestry, hydrology, climate change, and remote sensing. (Example: for my Master I in physical geography I worked on the management of territory for the sustainable conservation of plant biodiversity). Currently, with remote sensing approaches, I am doing my research on the monitoring of wildfires and their link with climate parameters.
