

Apply for a Science Corps Fellowship - Entry #3245

Name

Konstantinos Garyfallogiannis

Email

kgaryfallogiannis@gmail.com

Gender

Male

City, state, and country of residence

Den Haag, Netherlands

Nationality

Greek

When did or will you finish your PhD?

I finished my Phd at 29/9/2023

University Education

Ph.D. in Mechanical Engineering, University of Pennsylvania 2019 - 2023

Master of Science in Robotics, University of Pennsylvania 2020 - 2022

Master of Science in Mechanical Engineering, University of Thessaly 2017 - 2019

Bachelor of Science in Mechanical Engineering, University of Thessaly 2014 - 2017

What are your reasons for applying to be a Science Corps fellow?

I aspire to be a Science Corps fellow because I am deeply committed to the idea that science and education can be powerful catalysts for positive change in our society. I believe that as a Science Corps fellow, I can leverage my passion for science and my desire to make a meaningful impact by engaging with underserved communities. Becoming a Science Corps fellow will allow me to bridge the gap and empower students, particularly those

from underprivileged backgrounds, to explore the wonders of science and technology.

Furthermore, the Science Corps fellowship offers a unique opportunity to collaborate with like-minded individuals, educators, and organizations dedicated to promoting scientific literacy and equity. Together, we can inspire future generations of scientists, engineers, and critical thinkers who will contribute to addressing the complex challenges facing our world.

In summary, my desire to be a Science Corps fellow stems from my belief in the transformative power of science education and my commitment to promoting inclusivity in STEM fields. I am eager to contribute my knowledge and passion to this mission and make a lasting difference in the lives of young learners.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.

In addition to my academic studies, I've actively engaged in teaching and mentoring roles, tailoring my communication to diverse learners. Leadership positions in the academic context have sharpened my problem-solving and collaboration skills, vital for coordinating STEM initiatives.

Moreover, my background underscores the importance of critical thinking and problem-solving which are essential aspects of scientific education. My engagement with diverse cultural backgrounds has fostered cultural competence, enabling me to tailor STEM outreach effectively. My adaptability has been honed through collaboration with people of different backgrounds too.

These multifaceted experiences have prepared me to be an effective Science Corps fellow, combining a passion for scientific education with practical skills and an understanding of the unique needs of diverse communities.

Where do you imagine yourself professionally in the future? Check all that apply.

Doing science in industry

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

In industry, I can utilize valuable practical skills such as my engineering knowledge, adaptability, problem-solving, and clear communication that I have contained throughout my experience. These skills combined with my nature for application-oriented results can significantly aid efforts in solving pressing world problems.

How did you find out about Science Corps?

University email list

Any other comments/questions?

I am applying for the fellowship together with my partner, Nefeli Kryona. She doesn't hold a Ph.D., but she has a Master's in science teaching. We have contacted Christine Corry, and she informed us that such a scenario is possible.

Looking forward to hearing from you!

Sincerely,

Konstanitnos
