

JEVON MARSH, MSc, RYT

Pronouns: he/him/his

University College, Oxford, UK

Tele: + 44 7916 471293; E-mail address: jevon.marsh@univ.ox.ac.uk

EDUCATION

PhD Candidate (Inorganic Chemistry), <i>The University of Oxford, United Kingdom</i> Full-time. 2021 Rhodes Scholar; 2020 NSERC PGS-D Canada National Scholar.	2021- Present
MBA Candidate, <i>Quantic School of Business and Technology, Washington, USA</i> Part-time. Powell Impact and Sustainability Scholar.	2022- Present
MD Student, <i>Memorial University of Newfoundland, NL, Canada</i> Medical studies deferred until completion of PhD at Oxford in 2024.	2021- Present
Master of Science (Chemistry), <i>Queen's University, Kingston, ON, Canada</i> NSERC Alexander G. Bell National Scholar 2019; ThinkSwiss Scholar 2019.	2018-2020
Bachelor of Science (Joint Honours), <i>Memorial University of Newfoundland, NL, Canada</i> Double Honours Concentration: Chemistry and Biochemistry, First Class Standing.	2014-2018

EXPERIENCE

⇒ RESEARCH

- Managed and contributed to research projects in Canada and Europe in **interdisciplinary** and **multi-cultural teams**; highlights an aptitude for **teamwork**, an ability to be **trained quickly and efficiently in diverse projects**, **project management**, **adaptability**, **critical thinking**, **independence**, **leadership**, **supervisory**, and **multitasking** skills.
- Past research presented at conferences globally and currently being readied for publication, demonstrating strong **oral and written communication skills**.

PhD Graduate Student Researcher, Inorganic Chemistry **2021-Present** *The University of Oxford, Department of Chemistry, Oxford, UK*

- Exploring the synthesis of targeted platinum-based cancer therapeutics for cancers including a rare pediatric brain cancer and studying their biological effects.

MSc Graduate Student Researcher, Inorganic Chemistry and Chemical Biology **2018-2020** *Queen's University, Department of Chemistry, Kingston, Canada*

- Managed a project aimed at the synthesis of platinum-based therapeutics for rare thyroid cancer.
- Delivered presentations and reports to my team on a weekly and monthly basis.
- Supervised three BScH and two MSc students in my lab, overseeing their research projects and training them on laboratory techniques in synthesis, purifications, and NMR.

Invited Graduate Research Scholar, Bio-Inorganic Chemistry **2019- 2020** *Universität Zürich, Department of Chemistry, Zürich, Switzerland*

- Planned and employed advanced NMR Spectroscopic techniques (HNN COSY, JR-HMBC, HSQC) for characterization of the world's first unimolecular RNA guanine quadruplex architecture.

Invited Research Scholar, Analytical Chemistry **May 2018 – Sept. 2018** *Université de Bordeaux, INSERM, ChemBioPharm, Bordeaux, France*

- Engineered new supramolecular drug delivery systems (hydrogels) for anticancer therapeutics, and synthesized anti-sense oligonucleotides with improved biodistribution and cellular penetration as potential therapeutics for prostate cancer.

Undergraduate Research Scholar and Assistant, Pharmacology and Biomedicine

2016-2018

Memorial University of Newfoundland, Department of Pharmacy, St. John's, NL

- Successfully developed protocols to study the molecular signaling mechanisms of cerebrovascular dysfunction associated with stroke development in chronic inflammatory conditions.
- **Other skills:** confocal microscopy, ELISA assays, surgical procedures for organ collection, rat handling, blood sampling, and immunohistochemistry.

Invited Undergraduate Research Scholar, Nuclear Chemistry

May 2017 – Aug. 2017

Helmholtz- Zentrum Dresden- Rossendorf (HZDR), Dresden, Germany

- Engineered ultrasmall nanoparticles with radionuclides for fluorescent guided surgery to improve surgical resection of tumors; reported to my supervisor with weekly plans and updates. Nominated by my host institute (Germany) for the *Outstanding Innovation in Research Award (2017)*.
- **Other skills:** Typhoon, handling of radionuclides, nanoparticles.

Undergraduate Research Scholar and Assistant, Inorganic Chemistry

May 2016 – Aug. 2016

Memorial University of Newfoundland, Department of Chemistry, St. John's, NL

- Synthesized organic ligands and organometallic complexes (Al, Co, Fe) for use as potential catalysts to generate polymers from CO₂ for eco-friendly plastic production.
- **Other skills:** Microwave reactor, MALDI-TOF, ESI, glove box, recrystallization.

⇒ BUSINESS AND INNOVATION

Innovation and Business Strategy Fellow

Jun 2021- Aug 2021

Merck KGaA, Darmstadt, Germany

- Selected to join an interdisciplinary team of professional students for my scientific excellence to innovate a new project for the company in their healthcare sector.
- Successfully conducted research, developed a business plan and prototype for a novel idea ideated with my team. The project was pitched to investors and selected for further development.
- Received official training in business strategy and innovation.

Yoga Teacher and Founder

Dec 2020- Jun 2021

Yoga with Jevon

- Launched my own yoga business promoting health and wellness in my community.
- Designed yoga classes for beginners, scheduling classes, marketing and responding to clients.
- Launched a 1-month online program for rural/remote residents of NL that have no access to a gym.
- Currently paused due to my UK student visa prohibiting me from working as a trainer.

Venture for Canada Fellow [Declined]

Nov 2020

Toronto, Canada

- Awarded a fellowship in the entrepreneurial and innovation ecosystem after a rigorous selection process that evaluated my performance in a team with other interviewees and ability to develop new business projects and solutions to a problem in a 30min-1hr time limit.

⇒ TEACHING

Online Science tutor, Paper.Co, Online 2021- 2022

- Tutor students (ages 8-17) in chemistry, math, physics, biology, and psychology using a Socratic approach.

Laboratory Supervisor (Chem.), Queen's University, Canada 2018-2020

- Supervised 3 BScH and 2 MSc students in my lab, teaching technical skills and theoretical concepts.
- Established an **open, inclusive and positive** training environment which helped fellow students grow as independent scientists.

Laboratory Teaching Assistant, Depart. of Chem., Queen's University **2018-2019**

- CHEMISTRY/ ENGINEERING CHEMISTRY 212: Principles of Chemical Reactivity
- CHEMISTRY 282: Organic Chemistry for Life Sciences

(*Ranked as **one of the top three** TA's out of approx. 30 by students for second year Chemistry and Engineering)

Organic Chemistry Tutor Memorial University, St. John's, NL **2014- 2018**

- Organized **engaging** and **interactive** tutorial sessions for a 2nd year class to 25-30 students, followed by a Q&A to address any content-specific questions students had

ESL Tutor, Refugee and Immigrant Advisory Council, St. John's, NL **2016-2017**

- Taught classes and provided assistance to incoming refugees from various countries and of **various ages** (5-60) speaking many languages; demonstrates **strong communication skills, cultural appreciation** and work with **diverse populations**.

Lead Tutor (Rural), Bonavista, NL **2012-2014**

- **Inspired** by my own background, I **created my own tutoring program** offering weekly private sessions in STEM to students with disabilities from low SES backgrounds. I **tailored all sessions to each individual student**, introducing various methods until the best method of teaching for that student was identified.

RESEARCH HONOURS AND AWARDS

NSERC PGS-D Scholarship, Natural Sciences and Engineering Research Council, Canada **2020**

- Awarded based on academic and research excellence for PhD studies in a country of my choice.

University of British Columbia PhD Entrance Scholarship [Declined] **2020**

- Awarded to high calibre students based on merit and academic profile.

NSERC CGS- M Scholarship, Queen's University, Canada **2019**

- Nominated by Queen's for my MSc research on developing new anti-cancer therapeutics.

ThinkSwiss Scholar, Universität Zürich, Switzerland **2019**

- Using Nuclear Magnetic Resonance Spectroscopy to discover a novel therapeutic target for cancer.

MITACS Globalink Scholar, Université de Bordeaux, France **2018**

- Synthesis of prostate cancer therapeutics (patented) and engineering a new drug delivery system.

Outstanding Innovation in Research Award Nominee, MITACS **2017**

- Nominated by Germany for contributing to a new method in cancer diagnostics at HZDR.

Deutscher Akademischer Austauschdienst (DAAD)- RISE Scholar, HZDR, Germany **2017**

- Designing molecules using nuclear chemistry for cancer diagnostics (nanotechnology).

NSERC USRA, Memorial University of Newfoundland, Canada **2016-2018**

- Research internship in green chemistry awarded at my undergraduate institution.

Medicine Undergraduate Research Award, Memorial University of Newfoundland (Declined) **2016**

- Awarded to pursue research under the supervision of a member of the Faculty of Medicine.

ACADEMIC HONOURS AND AWARDS

Rhodes Scholarship, Rhodes Trust **2020**

- One of eleven Canadians selected for a full scholarship based on my academic excellence and leadership contributions for study at The University of Oxford.

Lou Visentin Award, Memorial University, NL **2018**

- **Top 5%**, Faculty of Science Dean's List for the entire program.

Queen's University Graduate Entrance Tuition Award **2018**

- Incoming graduate student at Queen's with the **highest academic standing in Chemistry**.

Brosnan Prize, Department of Biochemistry, Memorial University, NL **2018**

- Awarded for receiving a grade of A or higher in all required courses in my undergraduate program.

Mookerjee Prize, Department of Biochemistry, Memorial University, NL **2018**

- Awarded for being named to the Faculty of Science Dean's list throughout my Bachelor's.

The Dr. Maurice Saval Scholarship, Memorial University, NL **2015**

- Awarded for academic performance at the University Level.

Faculty of Science Dean's List, Memorial University, NL **2014-2018**

- **Top 10%** of the Faculty of Science within the given academic year.

The Bank of Montreal Scholarship, Memorial University, NL	2014-2018
▪ A four-year scholarship for undergraduate academic performance.	
Memorial University Entrance Scholarship	2014
The Marie Sullivan (Entrance) Scholarship, Memorial University, NL	2014
The Governor General's Award, Government of Canada	2014
▪ Highest provincially ranked students around Canada in the graduating year.	

LEADERSHIP HONOURS AND AWARDS

Powell Impact and Sustainability Scholarship	2022
▪ Awarded for improving the wellbeing of my community and the current state of the world.	
Leslie Thoms Convocation Award, Memorial University, NL	2018
▪ Selected by the President for my leadership in mental health advocacy and LGBTQ+ activism.	
Student Organization of the Year, Memorial University, NL	2018
▪ As Co-Chair of Memorial Minds, I implemented a new scholarship for students with financial need (<i>Beneath the Surface Scholarship</i>) and organized a mental health peer support program, community outreach events and conferences (e.g. Move for Mental Health, Speak Out, etc.).	
Colbourne Family Scholarship, Memorial University, NL	2017-2018
▪ Nominated by the Department of Chemistry for leadership contributions leading to over \$10,000 fundraised for non-profits working with marginalized populations and low socioeconomic community members (e.g. Bridge's to Hope, Stella's Circle, etc.)	
Certificate of International Volunteering, International Volunteer Headquarters	2017
▪ Helped lead the development of an addictions and mental health services centre for low-income individuals in Spain.	
The Volunteer Incentive Program Platinum Plaque, Memorial University, NL	2017
▪ For completing over 200 volunteer hours. Some projects included leading fundraisers to collect resources (food, clothing, mental health support) for low income families, providing donations for Christmas stockings to the Janeway, and initiating a city-wide food bank fundraiser, etc.	

SELECTED LEADERSHIP/VOLUNTEER POSITIONS (9/23)

Scholarship Selector, RISE, UK & USA	2022-Present
▪ Responsible for reviewing and interviewing exceptional candidates ages 15-17 from around the world for a new international scholarship initiative offered by the Rhodes Trust and Schmidt Fellows.	
Board of Directors, DAAD Alumni Association of Canada	2018-2020
▪ I bring my international experiences to establish productive multicultural and interdisciplinary research collaborations between Canada and Germany; my efforts resulted in a substantial increase in the number of Atlantic Canadians participating in international research. Demonstrates passion for research and providing opportunities for others, advocacy , and teamwork.	
Co-President and Director of Finance, Queen's Graduate Management Consultant Association	2018-2020
▪ Overseen a diverse team of other professionals organizing a mini-MBA series to provide an opportunity for graduate and professional students at Queen's to strengthen and gain new skills in business and consulting; the program became a great success and has been recognized by other institutes with students from across Ontario participating.	
▪ Demonstrates strong communication and teamwork skills, leadership, and financial competency.	
Vice-President External, Queen's Graduate Chemistry Society	2019-2020
▪ Represented students in the Department of Chemistry, voicing their concerns and advocating on their behalf for things including increased representation for international students, and leading discussions on where Queen's invests, and how that affects our students; demonstrates a passion for ensuring the opinions of others are heard, for advocacy, and contributions to decisions made at an institutional level.	

Memorial Ambassador, Memorial University

2017-2018

- Represented the students of Memorial alongside the President at various events; addressed a large audience (100+ people) and spoke on a public platform honouring the origins of Memorial University, commemorating the sacrifices of Newfoundlanders in the world wars, and extending appreciation for the generosity of alumni who funded hundreds of students' education at Memorial (including my own); demonstrated **skills in public speaking** and engagement.

Program Coordinator, Peer Support Program, MUN MINDS

2017-2018

- I was motivated to improve the lack of community mental health resources available, and successfully led a highly collaborative team of advocates and healthcare professionals to design and execute the program which provided mental health services to students and community members to help with those in a crisis.
- Demonstrates ability to **collaborate with others**, a **passion for social justice**, ability to **organize** and **lead** programs, and a desire to **establish welcoming and inclusive spaces** and listen **empathetically**.

Volunteer, International Volunteer Headquarters

2016-2018

- As **Director of Advocacy with MUNHOPE**, established a successful **collaboration** with an international volunteer organization, and recruited volunteers to assist in developing a **social services** centre for low-income persons with addictions and a mental illness in Spain.
- Executed fundraising events to raise funds, and managed a team of 12 members; exemplifies **initiative**, **strong communication**, **leadership**, and a **passion** for community service.

Advanced English Teacher, Refugee Immigration Advisory Council

2016-2018

- As an English Second Language Tutor, I worked with incoming refugees who spoke various languages demonstrating **strong communication skills** and an ability to work with **diverse populations**.
- I organized weekly 2-3 hour English classes that involved speaking, writing and reading activities; by working with my students one-on-one, I fostered **close working relationships** with all of my students and identified their strengths and weaknesses, and tailor my classes accordingly for their benefit.

Student Support Committee, Memorial University

2016-2018

- Organized an online mental health support service (*7 Cups of Tea*) for students at Memorial in collaboration with other advocates and professionals, increasing the number of mental health resources available; further exemplifies my **passion for the wellbeing of others**, and my desire to ensure a safe and equitable space is available for others when needed.

Co-Chair, Memorial Minds

2016-2018

- I successfully **spearheaded** a scholarship program (Beneath our Surface) to aid students in financial need, and a peer support program to increase available mental health resources in my community; provided a **welcoming** and **inclusive** space for those in crisis and **collaborated** with professionals for further assistance.
- Organized various community outreach events (e.g. Affettuoso, Move for Mental Health) and conferences (e.g. Speak out) helping raise over \$10,000 for non-profits.
- Advocated for and successfully obtained increased funds to train people in Mental Health First Aid in St. John's; demonstrated proficiency in **leadership**, a strong passion for **social justice** and an innate ability to **manage multiple tasks** and **oversee a team of professionals**.

CERTIFICATIONS AND CERTIFICATES

Registered Yoga Teacher (RYT-200), My Vinyasa Practice (Houston, Texas, USA)

2020

Trauma Informed Yoga Certificate, My Vinyasa Practice (Houston, Texas, USA)

2020

Indigenous Canada Certificate, University of Alberta (Alberta, Canada)

2020

Mini-MBA, GMCA- Queen's University (Kingston, Canada)

2020

Personal Finance Essentials, McGill University, Montreal, Canada

2020

Social Enterprise and Innovation Certificate, Memorial University (Canada)

2017

Mental Health First Aid, Mental Health Commissions of Canada

2016

PUBLICATIONS AND PRESENTATIONS

- Huang, S., **Marsh, J. W.**, White, J. R. G., *et al.* A colorimetric approach for monitoring the reduction of platinum(IV) complexes in aqueous solution. *New J. Chem.*, 2024,**48**, 7548-7551.
- Marsh, J.**, and Farrer, N. J. (2022, September). Peptides for Targeted Delivery of Pt(IV) Pro-Drugs in the Treatment of Rare Cancers. Poster presentation at the RSC Sir Geoffrey Wilkinson Dalton Poster Symposium 2022, London, UK.
- Wang, Z., **Marsh, J.**, Dominguez-Martin, A., Johannsen, S., Jurt, S., and Sigel, R. K. O. (2021). Two unimolecular RNA G-quadruplex solution structures formed by triple mutants of a 22mer from 5'UTR of bcl-2 oncogene. *Manuscript in preparation*.
