

Apply for a Science Corps Fellowship - Entry #3312

Name

Joanna Stimpson

Emailjo.l.stimpson@gmail.com**Gender**

Female

City, state, and country of residence

London, United Kingdom

Nationality

British

When did or will you finish your PhD?

May 2024

University Education

PhD | Molecular Biology | University of Manchester & Weizmann Institute of Science | Graduation: July 2024

Bachelors, First Class | Chemistry with year in industry | University of Bath | Graduation: July 2019

What are your reasons for applying to be a Science Corps fellow?

As I've progressed through university, I've realised the importance of science and education being accessible for as many people from different backgrounds as possible. Innovation and research thrive from people with different view points coming together to solve problems, which I experienced during my study abroad at the Weizmann Institute. As I have recently finished my PhD, I want to continue expanding my horizons and help more students know, understand and love science.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.

When studying at Weizmann, I was part of a large international community and actively contributed to bringing everyone together. I have done some chemistry and maths tutoring for GSCE level students.

Where do you imagine yourself professionally in the future? Check all that apply.

Doing science in industry

In science outreach

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

In the next two years, I want to find a career that actively works on improving the world - through scientific research, outreach or education. I want to effectively use the knowledge that I have accrued over my two degrees and continue gaining more skills as a hard working team member.

In the long term, I would like to have made a real contribution, however small, to society, in whichever direction I have chosen to take.
