

Apply for a Science Corps Fellowship - Entry #3231

Name

Nachiket Makh

Emailmakh.nachiket746@gmail.com**Gender**

Male

City, state, and country of residence

Greensboro, North Carolina and India

Nationality

India

When did or will you finish your PhD?

Spring 2024

University Education

PhD-Nanoengineering-North Carolina A&T State University, Greensboro, USA - Expected date of Graduation: Spring 2024

Masters Degree-Mechanical Engineering(Automotive Technology)- College of Engineering, Pune, India - Oct 2018

Bachelors Degree-Mechanical Engineering- Prof. Ram Meghe Institute of Technology & Research, Badnera(Amravati), India - July 2016

What are your reasons for applying to be a Science Corps fellow?

I am from India and I've observed that remote places in India still don't have the resources & tools at schools that could help students in gaining more practical knowledge. I think this would be a great platform for bridging that gap through fun learning where highly qualified people are brainstorming new ideas imparting practical education to students making them ready for tomorrow with good and complete understanding of the basics. From the little

knowledge that I've gained and still learning, I wish to pass on to the society that would help in shaping the students and I think this is the best platform to do so.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.

My parents are working in the education sector from past 30 years helping numerous students and are my greatest inspiration. Until my teenage days, I used to go with them at various programs that involved teaching and other outreach activities. During my under graduation, I used to help my junior students in studies by teaching them. Recently, I've taught an undergraduate class of NC A&T University teaching them to perform MD Simulations on nanotubes.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia

Doing science in industry

Administrative role in industry or academia

In science education

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

In the near two years, I wish to work in research domain as a material scientist in industry domain. This will help me in learning the new, advanced manufacturing & analysis techniques. And my long term goal is setting up my own research lab for testing materials for industry customers.
