

Apply for a Science Corps Fellowship - Entry #3306

Name

OLUFUNKE SANNI

Emailsanniolufunke4@gmail.com**Gender**

Female

City, state, and country of residence

Ibadan

Nationality

Nigerian

When did or will you finish your PhD?

2028

University Education

Btech Architecture

What are your reasons for applying to be a Science Corps fellow?

I am excited to apply for the Science Corp Fellowship Grant to support my research in the field of Architecture. As a graduate student holding a Bachelor's degree and Higher national diploma in Architecture with over 5years of experience in construction and 2years in oil and gas industry.I am passionate about interior design and Architecture and its potential to Contribute to the field of architecture and interior space for human comforts . This fellowship will enable me to pursue cutting-edge research under the guidance of scholars and professionals, expanding my skills in research ,design and software.I aim to interior design and Architecture design and contribute meaningfully to the scientific community.

The Science Corp Fellowship Grant will provide me with the necessary resources to:

- Conduct innovative research
- Present findings at conferences
- Collaborate with renowned scientists
- Develop my skills in scientific writing and communication

This support will be instrumental in helping me achieve my academic and professional goals. I am confident that this fellowship will empower me to make a positive impact in Architecture and contribute to scientific knowledge. Thank you for considering my application.

In addition to your studies, describe any relevant experiences that have prepared you for a Science Corps fellowship.

Throughout my academic journey, I have complemented my studies with various experiences that have prepared me for a Science Corps fellowship:

1. Research Assistant: Assisted a professor in conducting research on sustainable building materials, where I gained hands-on experience with data collection, analysis, and presentation.
2. Internship: Completed an internship with a renowned architecture firm, working on projects that integrated green technology and energy-efficient design.
3. Volunteer Work: Participated in a community development project, designing and building affordable housing units using locally sourced materials.
4. Leadership Roles: Held leadership positions in student organizations focused on sustainable design and environmental advocacy, honing my skills in project management, teamwork, and communication.
5. Work Experience: Worked in the construction industry for 5 years, overseeing projects and ensuring compliance with safety and environmental regulations.
6. Collaborations: Collaborated with interdisciplinary teams on design competitions and hackathons, developing innovative solutions for real-world problems.
7. Skills Development*: Acquired proficiency in software such as AutoCAD SketchUp, and Adobe Creative Suite, as well as rendering and animation works.

These experiences have not only deepened my understanding of architecture and design but also instilled in me a passion for scientific inquiry, collaboration, and community engagement. I am confident that my unique blend of academic and extracurricular experiences makes me an ideal candidate for a Science Corps fellowship.

Where do you imagine yourself professionally in the future? Check all that apply.

Academic scientist in academia

Administrative role in industry or academia

In science outreach

As far as possible from science/education

Expand on your selection above and describe where you imagine yourself professionally in the near (two year) and long-term (ten year) future.

After completing the Science Corps fellowship, I envision myself working as a:

1. Sustainable Design Consultant: Applying my research expertise to help architecture firms, construction companies, and government agencies integrate sustainable design principles and green technologies into their projects.
2. Research Assistant Professor: Contributing to research projects, teaching courses, and mentoring students in architecture, environmental science, or a related field at a university or research institution.
3. Green Building Specialist: Collaborating with organizations to develop and implement sustainable building practices, energy-efficient systems, and environmentally responsible construction methods.

In the near term, I aim to:

- Develop a strong professional network in the fields of sustainable design and architecture
- Publish research papers and present at conferences to share my expertise
- Contribute to the development of sustainable design standards and policies

Long-term (ten-year) future:

In the long term, I aspire to become a:

1. Leading Researcher: Establishing myself as a renowned expert in sustainable architecture and design, leading research teams, and securing grants to support innovative projects.
2. Academic Program Director: Overseeing and developing academic programs in architecture, environmental science, or sustainability at a university or research institution.
3. Sustainable Design Thought Leader: Influencing industry trends, policies, and practices through publications, public speaking engagements, and collaborations with government agencies, non-profit organizations, and private companies.

In the long term, I aim to:

- Make significant contributions to the scientific community through groundbreaking research
- Inspire and mentor future generations of sustainable design professionals
- Drive systemic change in the built environment through policy reforms and industry transformations

By achieving these goals, I believe I can make a meaningful impact on the environment and society while advancing my professional career.
