Oakland - NJ - 07436

Desiring a position in Computational and data science to develop and apply the following education and training:

- **Computational statistics:** Descriptive Statistics, linear regression, modeling (RCA, logistic regression), cross-validations, and kernel density. Project “RSA 911 Data Analysis”.
- **Probability and statistics:** probability, Discrete probability distributions, normal distribution, confidence intervals, sample size, hypotheses testing, random variables, and Exceptions.
- **Applied Science Mathematics:** Dimensional analysis, scaling, Differential equations, partial Differential equations, linear systems, nonlinear systems, calculus of variations, integral equations, and matrices.
- **Machine learning:** Data processing, association, correlations, classifications, clustering, and regressions. Project “Review and analysis of earthquakes dataset” to determine the facts of intensities and destructions.
- **Data mining and analysis:** attributes(numeric and categorical), normalizations, distance, numeric matrix, betweenness, eigenvectors, and values, Networks graph, large data set processing, and Quantitative data.
- **Database Management Systems:** information models and systems, the database environment, data modeling, conceptual modeling using the entity-relationship approach and mapping to relational tables, the relational model including the relational data structure, integrity rules, relational algebra and relational calculus, normalization, data definition, and data manipulation in SQL, conceptual, logical, and physical database design, security, transaction management, query processing, and advanced topics in database systems. Project” design auctions database and website using MySQL and PHP”.
- **Data Structure algorithms:** Algorithm efficiency analysis, Divide and conquer, Binary search, Linear Data structure, Hierarchical data structures, Dynamic programming, Binary tree, and Graph algorithm.
- **Social network analysis:** correlations and regression analysis, assortative analysis, centrality metrics, Community detection algorithms, link prediction technics, tie strength, theoretical network models, and epidemic analysis of social networks.

Languages

Python, C, PHP – MATLAB for numerical methods.

Education

Bachelor of sociology - Mansoura University - Egypt - 1999

Master of Science in Applied science and technology – Concentration in “Computer Systems and Network Technology” GPA 3.81 – 05/2020 - Alcorn State University.

Full-time Ph.D. Student “Computational and Data-Enabled Science and Engineering” Jackson State University- MS –fall 2021- graduation date 05/2023.

Certificate

Cisco Certified Network Associate ID: CSC012160017, IBM Python 101 for Data Science, IBM Data visualization with python, IBM Machine learning with python, IBM Big Data.

Work experience

Network technician period of March 2002 – April 2006 – CITC -Egypt

Network management period of April 2006 – May 2012 – CITC -Egypt

- Network technician Duty

Joined construction and network teams to Prepare network infrastructures, Installed and tested network cables Cat5 {straight, crossover} and consoles, extending fiber cables “single and multi-modes “, Racked and stacked routers, switches, and network devices Followed the network maps & marks and optical fiber cables paths, Followed and applied IP schemes for medium and large projects. Installing IP phones, Switches & routers installation and configuration {dynamic and statics}, PCs Maintenance "hardware & software", Setup of Windows Server.

- Network Management Duty

Prepared IT and network projects work breakdown structure “WBS”, Joined the project process group “initiation, executing, monitoring, and closing, communicate with the suppliers and managed contract roles and regulations, On-site supervision to stand on the latest projects’ work and achievements, report directly to the stakeholders and authorities, arranged conferences, meetings, and travel, managed the projects and daily duties Cash budgets, reviewed and searched for the latest IT and network supplies updates.

- Internship

Summer of 2022 - Department of Energy “DOE” – Omni internship “HepCloud–Glideinwms Developments” Fermilab - Batavia – IL.

Skills

Strong attention to detail, excellent organizational skills, and ability to manage multiple projects and responsibilities.

Ability to analyze data and translate results into valuable knowledge information. Excellent problem-solving skills.

Highly motivated self-starter with experience producing high-quality data deliverables and able to work independently and in a team environment.

Ability to deliver on tight timelines and move quickly while maintaining attention to detail.

Capability with Unit Test code for robustness, usability, and reliability.

Strong SQL and knowledge of data extraction and manipulation techniques including the ability to stage and import large volumes of data.

Ability to explore different directions based on data and be able to quickly change direction based on the analysis.

Strong communication skills and ability to thrive in fast-paced, multiple deliverables, team-oriented environment.

Academic Research

Published research: Communication technologies and developing countries ISBN-10: 9783843389341

Master thesis: Adoption of Cloud computing systems in Africa.

Conference

Summer of 2022 - DOE - OMNI - Internship Poster presentation “Fermilab – Batavia-Illinois”
