PROFILE

Studying for a **DPhil** in Engineering Science at Harris Manchester College, Oxford, with a **BEng (Hons)** in Mechanical Engineering from The University of Edinburgh **1st Class**.

A team player with demonstrable attention to detail, organisation, research, analytical, time management and presentation skills developed through practical intern experience in global and national healthcare market analytics; a good understanding of the financial funding of medical devices, innovative drugs and companies in the healthcare industry.

Leadership abilities gained from extra-curricular and voluntary activities; a keen musician; interested in Philosophy and Sociology and self-studying courses related to financial and economic subjects.

Good written and verbal communication skills in Mandarin (native) and English.

EDUCATION

2020 – 2024

Harris Manchester College, University of Oxford

DPhil Engineering Science (Biomedical Engineering)

Thesis title: The Full-brain 3D Computational Modelling of Cerebral Autoregulation Based on Haemodynamics.

2016 – 2020

The University of Edinburgh

BEng (Hons) Mechanical Engineering with Renewable Energy 1st Class

WORK EXPERIENCE

Jun – Sep 2022 **China International Capital Corporation Ltd., Shanghai** *Intern – Healthcare Industry Analyst*

Key responsibilities:

- Participating in roadshows of more than 40 projects covering medical devices including surgical robots, intelligent medical image-assisted therapy, pulse ablation devices, artificial blood vessels and stents, coagulation dressings and medical sutures and innovative drugs fields including ADC, synthetic biology, AAV gene therapy, and CART cell therapy.
- Working on due diligence and project approval of the C round financing of a domestic fluorescent endoscopy company; conducting management interviews, assisting in writing project approval reports and building DCF financial models.
- Assisting in the due diligence and project approval of a single-cell sequencing company's A round of financing; mapping the single-cell sequencing industry and taking part in investment decision-making meetings.

I gained knowledge of medical devices and innovative drugs and enhanced financial modelling and investment skills.

Mar – Jun 2022 **Gordian Ventures, Shanghai**

Intern - Healthcare Industry Analyst

Key responsibilities:

- Assisting the analyst to complete the mapping of the children's autism treatment and xenotransplantation industry in terms of historical development, technical means, and market size, investigating competing companies at home and abroad, and using Adobe Illustrator to complete the presentation of the industry scanning map.
- Participating in the A round financing of Full-Life Technologies incubated by Gordian Venture; mapping the business model and valuing competing companies at home and abroad; participating in the financing roadshow, resulting in Full-Life Technologies receiving 250 million RMB in financing from five investment institutions.

I improved teamwork, research, analytical, scan map drawing, organisation, time management and communication skills.

Aug – Oct 2021 **Shenwan Hongyuan Securities Co., Ltd., Shanghai** *Intern - Pharmaceutical Industry Analyst*

Key responsibilities:

- Using Bloomberg and Thomson ONE in addition to professional and public domain sources to research business data and related reports of various next generation sequencing (NGS) companies e.g., Illumina and Thermo Fisher.
- Independently creating a PPT presentation for an industry research report under supervision, including principles, advantages and disadvantages of each sequencing generation, the market size and customer needs of the China and global sequencing industry, comparison of domestic and global leading companies, the development forecast for the sequencing industry, and relevant investment recommendations based on the analysis.

- Participating in an investor open day of an NGS company and expert meetings, listening to the development analysis of the NGS industry, and carefully writing up accurate minutes thereof.

I developed equity research, presentation, communication, analytical and time management skills.

Jun – Jul 2021 Fosun Group, Shanghai

Intern - Pharmaceutical Industry Analyst

Key responsibilities:

- Using Wind to research business data and related reports of many domestic CXOs, assisting the industry analyst in analysing the long-term development trend of the domestic CXO market, discovering potential investment opportunities and completing the figures for several parts of the research report.
- Participating in the weekly internal senior management team meeting of Fosun Pharma, carefully noting the NMPA approval progress of the COVID-19 mRNA vaccine COMIRNATY® in the domestic market, compiling accurate minutes.
- Attending the 2021 Fosun Semi-Annual Working Conference, learning about Fosun Group's development plan for the next ten years, and translating the interim financial report of a recently acquired Indian pharmaceutical company.

I learnt attention to detail, organisation, presentation, multi-tasking, research and analytical skills.

OTHER SKILLS & ACHIEVEMENTS

- Proficient with Microsoft Office, Adobe Illustrator, OBS Studio, Auto CAD, PTC Creo, Solid Edge, ABAQUS/Explicit, COMSOL Multiphysics, C++, MATLAB, Python, Wind and Bloomberg.
- Passed CFA Level I and CFA Level II and will take CFA Level III in February 2024.
- Passed the securities qualification examination organised by the Securities Association of China in September 2022.

EXTRA-CURRICULAR ACTIVITIES

- Ubiquant Investment Student Ambassador at the University of Oxford, promoting a Chinese hedge fund.
- MATLAB Student Ambassador at the University of Oxford on behalf of MathWorks; Using social media outlets and popular communication channels to plan, promote and deliver online events to demonstrate MATLAB and Simulink.
- A member of the Oxford Finance Society. A member of the Philosophy Society at The University of Edinburgh.
- Student Consultant for the Oxford Strategy Challenge; working on a project for a local mental well-being company to increase its revenue. Part-time assistant (PTA) in the medical division in Roland Berger, Shanghai office in 2021.
- Deputy Team Leader of the Oxford Business Negotiation Team; organising a five-person team to conduct a review and analysis of the company and industry background for simulated case studies. Writing the business negotiation plan and simulating the negotiations between the parties in both Chinese and English.
- Volunteering at the Edinburgh Festival Fringe in 2019; helping organise the Contemporary Artists Competitive Week.
- Completing Coursera courses on Financial Markets, Private Equity and Venture Capital, and The Complete Investment Banking Course 2020 and currently studying Machine Learning.
- Enjoys swimming, going to the gym, table tennis and walking. Plays the piano and has given live recitals and online ones during the pandemic. Has studied Japanese and French and reads extensively on Philosophy and Sociology.
- Likes travelling and learning about different places and cultures; has visited Japan, Morocco, France, Switzerland, the Netherlands, Norway, Denmark, Sweden, Czech Republic, the UK and many places in China.
