

Apply to be a Science Corps Fellow - Entry #3344

Name
MUIDEEN TUNDE AROGUNDADE
Email
arogundadetumuideen@gmail.com
Gender
Male
Residence: City (State), Country
Osogbo (Osun), Nigeria
Nationality
Nigerian
When did you or do you expect to complete your PhD?
I wanted to start next year (2026)
Please tell us briefly about your university education (institution, city, country, year)
B.Sc Biochemistry: Osun State University, Osogbo, Nigeria, 2018
M.Sc Biochemistry: Osun State University, Osogbo, Nigeria, 2024
Why would you like to be a Science Corps Fellow?
I am thrilled to submit my application to be a fellow at Science Corps since I am an enthusiastic scientist and educator. With a solid foundation in biology and chemistry and a dedication to motivating the future generation of scientists, I am sure that this fellowship will provide me the abilities and information I need to succeed as a scientific educator. The complexities of life's chemistry have captivated me throughout my academic career. I have a strong foundation in the principles of biological sciences from my undergraduate and graduate studies. Working in labs has also given me invaluable research experience. I have also gained valuable research experience working in laboratories. I've had the honor of working as a teaching assistant and tutor at two separate high schools and online classes, respectively. In these roles, I was able to create and present lesson plans, evaluate students' comprehension, and offer tailored support. In a science club, I also served as a mentor to students as we discussed how scientific ideas might be applied in the real world. I gained a deeper comprehension of scientific concepts as well as a love for imparting information to others as a result of this experience. In conclusion, I am sure that the Science Corps fellowship will give me the best setting possible to develop as a

science teacher and motivate children in communities that are underprivileged. I am eager to start this journey and contribute to the scientific community because I have a solid background in biology and chemistry, have taught before, and have a great desire to motivate students.

In addition to your studies, please describe any prior experience that may help you as a Science Corps Fellow.

Recently at Scienspur, India, I just completed a post of teaching assistant for her fall school on Neurobiology. At the online class, I mentored many students from different background on science education and communication. Before that, I have been a chemistry and biology tutor under two different federal government schemes, Npower Scheme and National Youth Service Corps (NYSC) spanning more than two years. Under these schemes I have the privilege to interact with high school students and prepare them for the national exams.

Where do you imagine yourself professionally in the future? Check all that apply.

Scientist in academia
In science education
In science outreach

Please expand on your selection above and describe where you imagine yourself professionally in the near (~2 year) and long-term (~10 year) future.

Recently at Scienspur, India, I just completed a post of teaching assistant for her fall school on Neurobiology. At the online class, I mentored many students from different background on science education and communication. Before that, I have been a chemistry and biology tutor under two different federal government schemes, Npower Scheme and National Youth Service Corps (NYSC) spanning more than two years. Under these schemes I have the privilege to interact with high school students and prepare them for the national exams.

In two years time, I should be undergoing my PhD studying in cellular and molecular neuroscience so that I can be an expert in neuroscience. After my PhD, I dream of becoming a science educator and researcher holding a science club and research lab to be among solution providers for neurological disorders.
