

Apply to be a Science Corps Fellow - Entry #3336

Name
Fidel Soto-Gonzalez
Email
fidel.soto.gonzalez1@gmail.com
Gender
Male
Residence: City (State), Country
Houston
Nationality
Puerto Rican
When did you or do you expect to complete your PhD?
2023
Please tell us briefly about your university education (institution, city, country, year)
I possess a PhD in Biomedical Sciences, focused in Molecular biology, from Meharry Medical College, in Nashville, TN. I completed it in May 2023
Why would you like to be a Science Corps Fellow?
Yes
In addition to your studies, please describe any prior experience that may help you as a Science Corps Fellow.
I am thrilled to apply for the Science Corps Fellowship, as it aligns perfectly with my passion for STEM education and my commitment to bridging gaps in scientific access. My PhD in Biomedical Sciences has provided me with a deep understanding of complex scientific concepts, and my teaching and mentoring experiences have equipped me with the skills to communicate these ideas effectively to diverse audiences. My journey in education began during my role as a Research Assistant at Ohio State University, where I mentored and trained students in wound healing research. This experience taught me the importance of hands-on learning and fostering curiosity in students. Currently, I continue this work as an instructor at San Jacinto Community College, where I teach Biology and Anatomy and Physiology. I make it a priority to understand my students' unique struggles and personalize their learning experiences, ensuring they not only grasp the material but also gain confidence in their abilities.

Additionally, my multicultural teaching experience has shaped my approach to education. During my PhD at an HBCU, I had the privilege of tutoring, teaching, and mentoring minority students pursuing careers in medicine, dentistry, and master's programs. Many of these students faced significant educational challenges, and I worked closely with them to build foundational skills and foster their academic growth. This experience underscored the importance of empathy, adaptability, and cultural awareness in effective teaching.

I believe the Science Corps Fellowship offers an incredible opportunity to leverage my expertise in biomedical sciences and my dedication to education to inspire students globally. I am eager to contribute by developing impactful science curricula and empowering underserved communities through STEM education. Thank you for considering my application; I look forward to the possibility of advancing Science Corps' mission as a fellow.

Where do you imagine yourself professionally in the future? Check all that apply.

Scientist in academia

Doing science in industry

Administrative role in industry or academia

In science education

In science outreach

Please expand on your selection above and describe where you imagine yourself professionally in the near (~2 year) and long-term (~10 year) future.

In the near future (~2 years), I envision myself continuing to combine my expertise in biomedical sciences with my passion for education and mentorship. I aim to deepen my impact in STEM education by engaging with underserved communities through initiatives like the Science Corps Fellowship, where I can contribute to curriculum development, inspire students globally, and foster a love for science. I also see myself refining my teaching methodologies to better address diverse learning needs, further enhancing my ability to connect with students from various backgrounds.

In the long term (~10 years), I aspire to establish myself as a leader in STEM education and outreach, potentially directing programs that focus on bridging educational gaps in underrepresented communities. My goal is to create sustainable systems that empower students with the tools and confidence they need to pursue careers in science. Additionally, I hope to integrate my biomedical research background into these efforts by developing interdisciplinary programs that connect cutting-edge science with accessible education. Ultimately, I want to contribute to a global movement that ensures equitable access to quality STEM education for all, fostering innovation and diversity in the scientific community.
