

Apply to be a Science Corps Fellow - Entry #3332

Name
Aravind R
Email
aravindspg@gmail.com
Gender
Male
Residence: City (State), Country
India
Nationality
Indian
When did you or do you expect to complete your PhD?
Jan 2025
Please tell us briefly about your university education (institution, city, country, year)
I did my undergraduate at Yuvarala's college, Mysore, India in Biochemistry/Microbiology/Biotechnology from the year 2011-2014. Further, I did my graduation at Institute of Bioinformatics and Applied Biotechnology (IBAB) in Bioinformatics from the year 2014 to 2016. Next two years, I was JRF at IBAB and the National Centre for Biological Sciences (NCBS). Further, in 2018, I started my PhD at Dr.Ranabir Das lab at NCBS in the field of Computational Structural Biology and submitted my thesis on Oct 2024.
Why would you like to be a Science Corps Fellow?
Being from an economically weaker background, I received my education free of cost till my graduation. I believe in giving it back to the society in all the ways I can. Additionally, I love teaching. Science Corps will be the best place to bridge the gap between "What I know" and "How can I help the society with it".
In addition to your studies, please describe any prior experience that may help you as a Science Corps Fellow.
I have been involved in curricular and non-curricular teaching at schools and one-on-one classes online to individuals.
Where do you imagine yourself professionally in the future? Check all that apply.
Doing science in industry In science education

Please expand on your selection above and describe where you imagine yourself professionally in the near (~2 year) and long-term (~10 year) future.

In the longer-run, I can't imagine myself as anything but teaching at schools/colleges in villages where I believe I can be impactful. But before that, I would like to have an economically stable life and thereby would like to start my carrier in industry and move on to teaching.

Please upload your CV (.pdf)
