

Apply to be a Science Corps Fellow - Entry #3342

Name
Angela Davis
Email
angeladavis148@yahoo.com
Gender
Female
Residence: City (State), Country
Huntsville, AL USA
Nationality
African American
When did you or do you expect to complete your PhD?
May 2025
Please tell us briefly about your university education (institution, city, country, year)
Alabama A&M University B.S., Chemistry & B.S. Mathematics Normal, AL GPA 3.60, Magna Cum Laude May 1997 M.S., Physics Normal, AL GPA: 3.69, Magna Cum Laude December 1999 Ph.D., Applied Physics GPA: 4.0 May 2025 Dissertation: Investigating optimal polyvinylidene fluoride (PVDF) concentrations for its applications as efficient smart materials
Why would you like to be a Science Corps Fellow?
I have taught on the collegiate level for over 10 years. I am always fascinated by the teaching methods and verbiage necessary to connect to students in today's learning environment. I look forward to learning new techniques and styles which would allow me to leverage my current STEM knowledge to improve science education and build STEM knowledge to an array of communities.
In addition to your studies, please describe any prior experience that may help you as a Science Corps Fellow.
AAMU Physics Department Adjunct Instructor Normal, AL August 2024 – Present • Taught algebra based physical science to 90+ students in weekly face to face lecture sessions. • Taught algebra based physical science labs to 90+ students in weekly face to face lab sessions.

Atlanta Technical College | Online Adjunct Instructor Atlanta, GA July 2019 – Present

J. F. Drake State Technical College | Online Adjunct Instructor Huntsville, AL August 2022 – Present

Chattahoochee Technical College | Online Adjunct Instructor Atlanta, GA Jan. 2019-Oct. 2023

ITT Technical College Atlanta, GA, | Online Adjunct Instructor Atlanta, GA Dec. 2011-Mar. 2015

- Taught algebra and trigonometry-based courses in weekly face to face sessions, presenting the essentials of physics, chemistry, earth science, and astronomy.
- Produced consistent and prompt feedback to students and advised students on academic, attendance, and behavioral matters.
- Motivated students to engage in all facets of the educational process, diligently maintained and reported student grades and attendance following college policies.

Where do you imagine yourself professionally in the future? Check all that apply.

Scientist in academia

Doing science in industry

In science education

In science outreach

Please expand on your selection above and describe where you imagine yourself professionally in the near (~2 year) and long-term (~10 year) future.

Graduating in May 2025 allows me to pursue a myriad of employment opportunities. If I am fortunate to work in a national lab I will complete a 3 year post doc assignment and then proceed accordingly as a staff scientist, etc, This will also allow me to decide if I would like to stay on the research side of things or move to education or industry. I know that I will continue to teach on the collegiate level in some capacity because I love being able to give back and connect science to students to increase the knowledge of how science is used everyday (they just don't always realize it and connect it to their actions). I would also like to see an increase in under represented communities in STEM and I think I could play a vital role in that area. In 10 years I see myself fully immersed in the science world whether industry or national lab not sure at this juncture, but I know I will definitely still be affiliated with higher education and some form of outreach!
