
JENN D. WAGNER, M.S.

UC Berkeley | Department of Integrative Biology
jenn_wagner@berkeley.edu

EDUCATION

- 2019-Present** **Ph.D. candidate | University of California, Berkeley** | Department of Integrative Biology
Dissertation title: *Investigating paleobotanical proxies and applying them: using fossil leaves to better understand periods of global warming in Earth's past.*
Advisor: Dr. Cindy Looy
- 2019** **M.S. | Baylor University** | Department of Geosciences
Thesis title: *Plant community change across the Paleocene-Eocene Boundary in the Gulf Coastal Plains, central Texas.*
Advisor: Dr. Daniel Peppe
- 2014** **B.S. | University of Central Arkansas** | Department of Biology

RESEARCH EXPERIENCE

- 2019- Present** **Graduate Researcher at UC Berkeley**
Member of Dr. Cin Looy's Paleobotany and Paleoecology Lab where I work with living and fossil plants to investigate light influence on leaf morphology and apply paleobotanical proxies for paleoclimate and pCO₂ reconstruction. While at UCB, I have conducted multiple fossil leaf collections, prepared and described fossil leaves, prepared extant and fossil leaf cuticles for microscopy and stable isotope analysis, and photographed extant and fossil leaves at the macro and micro scale. I've mentored many undergraduate students and am affiliated with and contributed to the collections in the UC Museum of Paleontology. I have also worked with and photographed collections at the Florida Museum of Natural History. The work from my dissertation lead to a collaboration and co-authored publication in the American Journal of Botany and will produce at least three more publications in botanical and paleoclimate journals.
- 2016-2019** **Graduate Researcher at Baylor University**
Member of Dr. Dan Peppe's Paleoclimate, Paleobotany, and Paleomagnetism Research Lab where I worked with fossil plants to study plant community composition and paleoclimate at the Paleocene-Eocene Boundary in central Texas. This research led to a publication in PALAIOS. In addition to working with fossil leaves, I also helped prepare and process paleomagnetic samples.
- 2014-2016** **Biology Intern at Camp J. T. Robinson Department of Natural Resources**
Part-time (1000 hours/year) – Assisted with invasive and native plant and animal surveys, created a monarch butterfly way-station, conducted multiple rapid-bioassessments of streams in the training areas and wrote up the results and implications, conducted gypsy moth surveys, and helped with prescribed burns.
- 2012-2014** **Undergraduate Researcher at the University of Central Arkansas**
I helped with research in Dr. Rick Noyes' lab that focused on understanding the biology and evolution of apomixis using daisy fleabane (*Erigeron annuus*). This ultimately led to a co-authorship on a paper in the American Journal of Botany. I also helped with research in Dr. Sally Entrekin's lab, assisting with aquatic macroinvertebrate collection and identification.

GRANTS & FELLOWSHIPS

- 2025 UCMP Research Grant **(\$1164)**
- 2024 UC Dissertation Year Fellowship **(\$36,000)**
- 2023 IB Summer Research Award **(\$2000)**
- 2023 APS Lewis and Clark Research Award **(\$3000)**
- 2023 UCMP Research Grant **(\$3000)**
- 2022 UCMP Travel Grant **(\$1200)**
- 2022 IB GRAC Travel Funds **(\$230)**
- 2022 UCMP Research Grant **(\$2450)**
- 2020 UCMP Research Grant **(\$2751)**
- 2018 Dallas Paleontological Society Frank Crane Memorial Scholarship **(\$1000)**
- 2018 Paleontological Society Stephen Jay Gould Award **(\$1200)**
- 2017 Baylor University Graduate Research Grant **(\$2000)**
- 2017 Baylor University Travel Grant **(\$600)**
- 2013 University of Central Arkansas P3 Grant **(\$2000)**

AWARDS

- 2024 UC Berkeley Department of Integrative Biology Outstanding GSI
Nominated for my work as head graduate student instructor for General Biology (1B), a class with ~650 students and 36 lab sections
- 2024 NorCal Geobiology Symposium Outstanding Poster Presentation

TEACHING EXPERIENCE

University of California Berkeley

Graduate Student Instructor

General Biology (1B) Lab

Head GSI, 1 semester | Fall 2023

A course for majors of ~650 students and 36 lab sections. General introduction to organismal diversity, ecology, and evolutionary biology intended for students majoring in the biological sciences. As head GSI, it was my job to lead all lab set up and reset, including specimen acquisition and care, along with updating the course website, set-up for the Friday teaching meetings, and teach labs when needed.

Curriculum Development, 1 semester | Fall 2021

Helped edit and update lab materials for the course and helped conduct a pilot study investigating best methods for teaching plant life cycles.

Lab Sections, 4 semesters | Fall 2019, 2020; Spring 2021; Summer 2021

Taught 2 weekly lab sections, helped create quiz content, offered weekly office hours

Infectious Disease Dynamics (IB 114)

Discussion Sections, 1 semester | Summer 2023

Taught 4 weekly discussion sections, graded assignments and exams, helped with course logistics and bCourses page, offered weekly office hours. Upper-level course that teaches ecological and evolutionary principles in the light of infectious diseases.

The Living Planet (IB 159)

Discussion Sections, 2 semesters | Spring 2023, 2024

Taught 2 weekly discussion sections, graded quizzes, helped with course logistics and bCourses, offered weekly office hours. Upper-level course that discusses the impact of the biosphere (primarily plants) on the Earth System.

Evolution (IB 160)

Discussion Sections, 1 semester | Fall 2022

Taught 3 weekly discussion sections (50 students total), record student attendance, grade papers, grade worksheets, helped set up exams with accommodations, management of GradeScope and bCourses. Upper-level course that discusses the history, patterns, and processes of evolution.

General Biology (1A)

Discussion Sections, 1 semester | Spring 2022

Taught 3 weekly discussion sections (60 students total) and helped write quiz and exam questions. Introductory course that discusses cell structure and function, molecular and organismal genetics, and animal development, form, and function.

Paleobotany (IB 181)

Lab Sections, 1 semester | Spring 2020

Taught 2 weekly lab sections (40 students total), set-up labs, collected specimens for labs, and helped write quizzes. Upper-level course that serves as an introduction to the evolution of plants and terrestrial ecosystems.

Reader

General Biology (1B)

Lecture, 1 semester | Summer 2022

Helped edit and create supplementary reading content for the lecture.

Thriving in Academia (IB 305)

Lecture, 2 semesters | Fall 2022, 2023

Led weekly writing groups, recorded student attendance, gave feedback on assignments, managed bCourses, organized two alumni career panels, arranged invited lecturers, and organized course materials.

Graduate-level course that prepares graduate students for many aspects of academic careers through a series of lectures and workshops.

Graduate Remote Instruction Innovation Fellow Program

General Biology (1B)

6-week project | Winter 2021

Created an interactive pdf for students to use to accompany their remote plant diversity labs.

Baylor University

Graduate Teaching Assistant

World Oceans (Geo 1402)

Lab Sections, 3 semesters | Fall 2017- Fall 2018

Description: Introduction to oceanography emphasizing human interaction with the oceans: ocean resources, global environmental ethics, and conflicts resulting from ocean exploitation

WORKSHOPS, TALKS, AND CONFERENCE PRESENTATIONS

Workshops

2025 **Field Research Safety: Learning From Near Misses**

Interactive field-safety workshop by Steve Smith that focuses on how we can create an organizational commitment to reporting, understanding, and learning from the near-misses that occur, rather than waiting for tragedy.

Developing a Statement of Teaching Philosophy and Teaching Portfolio

Workshop for improving teaching and preparing for the academic job search. Attendees learn best practices for preparing a teaching philosophy, statement, and portfolio.

Peer Exchange and Feedback on Statements of Teaching Philosophy

Workshop designed for graduate students who are interested in improving their statement of teaching philosophy through feedback from peers. Attendees exchange statements and provide and receive input.

Universal Design for Learning

Workshop for deepening knowledge of inclusive teaching practices by exploring the Universal Design for Learning framework.

Syllabus and Course Design, UC Berkeley Workshop on Teaching for GSIs through the GSI Teaching and Resource Center. Participants learned ways to turn their syllabus ideas into integrated courses and worked out criteria for selecting course materials, assignments, and methods of assessment.

Creating and Using Grading Rubrics, UC Berkeley Workshop on Teaching for GSIs through the GSI Teaching and Resource Center.

How Students Learn, UC Berkeley Workshop on Teaching through the GSI Teaching and Resource Center. This workshop enables instructors to consider ways to apply research-based principles to the learning environments they create for their students.

2024 **R Fundamentals Workshop**, UC Berkeley D-Lab Workshop that introduces and explores R basic data visualization and manipulation

2023 **PBot Hack-a-Thon Workshop**, NSF-Earthcube funded Integrated Paleobotany Database (PBot)

2022 **R Data Wrangling and Manipulation Workshop**, UC Berkeley D-Lab Workshop that introduces different ways to manipulate and visualize data.

Invited Talks

*Undergraduate Mentee

Wagner, J.D., Tandon, R. *, and C. Looy, 2025, Evaluating the robustness of paleobotanical proxies using leaf variation in *Quercus* sp. and *Platanus occidentalis*. Florida Museum of Natural History, Paleobotany Lab Meeting, Gainesville, Florida.

- Wagner, J., Mahajan, I. *, Patharkar, T. *, Tandon, R. *, Vigil, E *, Michel, L., and C.V. Looy, 2024, Paleoclimate, paleo CO₂, and paleoecology of the middle Eocene floras from the Claiborne Group in Tennessee and Kentucky, USA. Invited speaker for Dr. Steve Manchester's Paleobotany lab research meeting, virtual.
- Wagner, J., 2023, Investigating paleobotanical proxies and applying them: using fossil leaves to better understand periods of global warming in Earth's past. Invited speaker for University of Central Arkansas Allies in STEM, Conway, Arkansas.

Conference Presentations

First Author

- Wagner, J., Mahajan, I.*, Patharkar, T.*, Tandon, R.*, Vigil, E K.*, Michel, L., and C.V. Looy. 2024, Geological Society of America Connects, Anaheim, California, oral presentation.
- Wagner, J., Mahajan, I.*, Patharkar, T.*, Tandon, R.*, Vigil, E*, Michel, L., and C.V. Looy, 2024, 15th International Palynological Congress & 11th International Organisation of Paleobotany Conference, Prague, Czech Republic, poster presentation.
- Wagner, J., Mahajan, I. *, Patharkar, T. *, Tandon, R. *, Vigil, E *, Michel, L., and C.V. Looy, 2024, 2nd Annual Northern California Geobiology Symposium, Stanford University, California, poster presentation.
- Wagner, J., Mahajan, I. *, Patharkar, T. *, Tandon, R. *, Michel, L. *, and C.V. Looy, 2023, 40th Midcontinent Paleobotanical Colloquium, Gainesville, FL, oral presentation.
- Wagner, J., Mahajan, I.*, Patharkar, T. *, Tandon, R. *, Michel, L., and C.V. Looy, 2023, 1st Annual Northern California Geobiology Symposium, Stanford University, oral presentation.
- Wagner, J., Kouwenberg, L., and C.V. Looy, 2022, Botanical Society of America Conference, Anchorage, Alaska, oral presentation.
- Wagner, J., Peppe, D., Dension, C., and O'Keefe, J., 2022, 11th European Paleobotany and Palynology Conference, Stockholm, Sweden, oral presentation.
- Wagner, J., and D. Peppe, 2020, Dallas Paleontological Society, Virtual, oral presentation.
- Wagner, J., and D. Peppe, 2020, Geological Society of America, Virtual, oral presentation.
- Wagner, J., and D. Peppe. 2020, 37th Midcontinent Paleobotanical Colloquium, virtual, oral presentation.
- Wagner, J., and D. Peppe. 2019, 36th Midcontinent Paleobotanical Colloquium, Lawton, Oklahoma, oral presentation.
- Wagner, J., and D. Peppe, 2018, Geological Society of America, Indianapolis, Indiana, poster presentation.
- Wagner, J., and D. Peppe, 2018, Green Life Symposium, Ann Arbor, Michigan, poster presentation.
- Wagner, J. and R. Noyes, 2013, Botanical Society of America, New Orleans, Louisiana, oral presentation.
- Wagner, J. and R. Noyes, 2012, University of Central Arkansas Chalk Talk Seminar, Conway, AR, oral presentation.
- Wagner, J. and R. Noyes, 2012, University of Central Arkansas Student Research Poster Symposium, Conway, AR, poster presentation.

Co-author

- Vigil, E K.*, Champion, R., Roberson, P., **Wagner, J.**, and L. Michel, 2023, Geological Society of America, Pittsburgh, Pennsylvania, poster presentation.
- Mahajan, I.*, **Wagner, J.**, Patharkar, T.*, Tandon, R.*, Michel, L., and C. Looy, 2023, 1st Annual Northern California Geobiology Symposium, Stanford University, California, poster presentation.
- Patharkar, T.*, **Wagner, J.**, Mahajan, I.*, Tandon, R.*, Michel, L., and C. Looy. 2023, 1st Annual Northern California Geobiology Symposium, Stanford University, California, poster presentation.

Tandon, R.*, **Wagner, J.**, Kouwenberg, L., and C. Looy. 2023, 1st Annual Northern California Geobiology Symposium, Stanford University, California, poster presentation.

Mahajan, I.*, **Wagner, J.**, Kouwenberg, L., and C. Looy. 2022, Botanical Society of America, Virtual, Lightning Talk.

Patharkar, T.*, **Wagner, J.**, Kouwenberg, L., C. Looy. 2022, Botanical Society of America, Virtual, Lightning Talk.

Milligan, J., Dunn, R., Flynn, A., Kouwenberg, L., **Wagner, J.**, White, J., Zechmann, B., and D. Peppe, 2020, Geological Society of America, Virtual/Online, oral presentation.

MENTORING EXPERIENCE

Research projects

University of California Berkeley (2020-Present)

Investigating and applying palaeobotanical proxies: using leaves to study periods of climate change in Earth's past. Students helped with various aspects of the projects including fieldwork, lab work, data collection, data visualization, data presentation, and manuscript preparation.

Undergraduate mentees: 9 students over the course of 4 years, usually 3 at a time.

Tennessee Technical University (2023-2024)

Describing and measuring the insect damage frequency on fossil leaves from middle Eocene deposits in western Kentucky. Student helped with fossil collection, preparation, and photography. E was co-advised by Dr. Lauren Michel at Tennessee Tech and conducted all measurements and descriptions of insect damage. They presented their results at GSA 2023 and are working to complete their honor's thesis.

Undergraduate mentee: 1 student

Baylor University (2018)

Helping with fieldwork in Bastrop, Texas where we were conducting census collections of fossil floras. Britney was co-advised by Dr. Lisa Boucher at UT Austin.

Undergraduate mentee: 1 student

Pollinator garden

The students helped restore the pollinator garden outside of UC Berkeley's Valley Life Science Building. The project was led by then undergraduate Tanmayi Patharkar and I helped mentor and provide feedback.

Undergraduate mentees: 20 students over 2 years

MUSEUM EXPERIENCE/AFFILIATION

University of California Museum of Paleontology | 2019-Present

Collection, preparation, digitization, and archive of Cenozoic fossil leaf impressions and leaf cuticles.

University of Florida Museum of Natural History | 2019, 2023

Photographing, describing, and comparing fossil leaf morphotypes among collections from Eocene deposits throughout the Gulf Coastal Plain.

Baylor University | 2017-2019

Collection, preparation, and digitization of fossil plants. These are currently housed at the Baylor Science Building in Waco, Texas.

LABORATORY EXPERIENCE

University of California, Berkeley

Paleobotany and Paleoecology Lab | Advisor: Cindy Looy | 2019-present

Preparation of leaf cuticle for microscopy, fossil leaf preparation and morphotyping (Manual of Leaf Architecture), paleoclimate and paleoecological proxies, stomatal density/index, advanced use of excel, proficient in R, ImageJ, Adobe Illustrator, Adobe Photoshop, microscopy

UCMP Acid Lab | Advisor: Diane Erwin | 2022-present

Preparation of leaf cuticles for hydrofluoric acid treatment, working with hydrofluoric acid in small quantities to dissolve siliciclastic materials from fossil leaf samples for microscopy and stable isotope analysis

Center for Stable Isotope Biogeochemistry | Advisor: Wenbo Yang | 2022-present

Preparation of plant leaf material for carbon and nitrogen stable isotope analysis

Baylor University

Paleobotany, Paleoclimate, and Paleomagnetism Lab | Advisor: Daniel Peppe | 2016-2019

Fossil leaf preparation and morphotyping, paleoclimate and paleoecological proxies, paleomagnetometer (preparation of samples and utilization)

University of Central Arkansas

Plant Evolution Lab | Advisor: Richard Noyes | 2012-2014

Stomatal density/index, preparation and count of chromosomes for various ploidal levels, preparation of slides for observation of gametophyte development in *Erigeron*, differential interference contrast (DIC) imaging of ovules to evaluate megasporogenesis (meiosis vs. diplospory in *Erigeron*), PCR, gel electrophoresis, genome size measurement via flow cytometry, next generation sequencing methods (nuclear and chloroplast genomes), in vitro seed germination, plant care and maintenance.

Stream Ecology Lab | Advisor: Sally Entrekin | 2013

Collection of benthic invertebrates in streams, stream rapid bio-assessment, plant identification to species, aquatic macro and microinvertebrate identification to genus, preservation of benthic invertebrates, water quality testing (turbidity, pH, conductivity, etc.)

FIELD EXPERIENCE

Claiborne Group; western Tennessee & Kentucky | 2021-2024

Fossil leaf excavation, description, photography, and collection; mentoring undergraduate students

John Day Fossil Beds, Oregon | 2022

Describing the stratigraphy and vertebrate fossil collection

Wilcox and Claiborne Groups; Bastrop, Texas | 2017-2019

Stratigraphy, sedimentology; fossil leaf excavation, description, and collection

San Juan Basin; New Mexico | 2018

Fossil leaf excavation, description, and collection

Camp Joseph T. Robinson; North Little Rock, Arkansas | 2014-2016

Small mammal trapping, herpetofauna surveys, flora surveys (herbaceous and tree identification and collection), invasive plant removal, deer surveys, helped with prescribed burning, conducted stream rapid-bioassessment.

SERVICE AND PROFESSIONAL ORGANIZATIONS

Department

2022-2024 Department of Integrative Biology (IB) | **Graduate Student Representative**

Served as an intermediate between the graduate students and faculty. Attended weekly faculty meetings and monthly graduate student meetings with the department chairs and held monthly graduate student meetings.

2023 IB Graduate Student Orientation Week | **Organizer**

Organized and facilitated the fall 2023 department graduate student camping trip at Blue Oak Nature Reserve

2022-2023 IB Graduate Student Association | **Reoccurring events coordinator**

Helped coordinate weekly and monthly social events for the graduate students

2022 IB Diversity, Equity, and Inclusion and Belonging Committee | **Graduate Student rep**

Met with faculty and staff to discuss goals and initiatives for advancing DEIB in the department.

- 2022 CalDay at UC Museum of Paleontology, Berkeley | **Volunteer**
Worked the museum's booth for UC Berkeley's CalDay that focuses on incoming freshmen and what the campus can offer their students
- 2017-2019 Baylor Graduate Undergraduate Mentorship Program | **Mentor**
Met weekly with mentee to go over goals, setbacks, and methods for studying.
Baylor Geological Society | **Historian**
BTRUE Graduate Student Panel | **Panel Member**
- 2011-2013 Earth Day at University of Central Arkansas | **Biology Booth Volunteer**
UCA's CNSM 'Science Nights' | **Volunteer**
- Public**
- 2025 John Muir Elementary (Oakland, California) Climate Change Panel | **Panel Member**
Scientists explain their research to elementary students and provide answers to questions related to their climate change research and job experience.
- 2025 West Side High School (Greers Ferry, Arkansas) virtual classroom visit | **Paleontologist**
Discussed being a paleontologist with two 8th grade classes while incorporating vocabulary terms from their Earth Science class and local paleontology.
- 2024 Bay Nature Bioblitz: UC Berkeley Campus | **Taxonomist**
Community event hosted by Bay Nature that focuses on exploring areas and recording observations using iNaturalist. I helped participants in the event identify plant and mushroom specimens that could not be identified by iNaturalist.
- 2023 UC Museum of Paleontology and Ala Costa Internship Program | **Intern**
Met monthly with students from Ala Costa to edit and revamp one of the museum's educational websites to make it more accessible and inclusive.
- 2023 California Academy of Science NightLife | **Volunteer science educator**
Displayed fossils and discussed Jurassic paleontology with the public during CAS Jurassic NightLife
- 2022-2023 ACCESS Professional Learning Committee | **Graduate student representative**
Met monthly with graduate students and community college professors to brainstorm and edit lessons for Advancing Community College Education and Success by incorporating new, evidence-based teaching methods.
- 2022-2023 Cal Queer Grads | **Media/Outreach**
Met weekly with group organizers to plan social events on and off campus, discuss and provide resources to group members, and put together the monthly newsletter
- 2020 Midcontinent Paleobotanical Colloquium (MPC), Virtual | **Organizer**
Helped organize and facilitate the virtual colloquium
- 2019-2024 Bay Area Scientists Inspiring Students (BASIS) | **Volunteer educator**
Helped teach paleontology lessons to elementary students at schools in the Bay Area
- 2019-2022 Advancing Community College Education and Success (ACCESS) | **Volunteer educator**
Helped teach paleontology lessons using specimens from the UC Museum of Paleontology for community college classes in the Bay Area
- 2018 Central Texas Sciences and Engineering Fair | **Poster referee**
- 2017 Waco Montessori School | **Volunteer educator**
Taught paleobotanical lessons to elementary school students
- 2015 Girl Power in STEM at UCA | **Team Leader**
Helped facilitate group activities for female middle school and high school students
- 2012-2013 University of Central Arkansas Gay Straight Alliance | **President** 2013, **Secretary** 2012
Organized and led weekly and monthly meetings and helped schedule and coordinate events for the registered student organization

2011-2013 University of Central Arkansas Stream Team | **Undergrad Organizer**
Helped lead sample and data collection for the rapid bioassessment of Stonedam Creek on UCA's campus.
Conway, Arkansas Eco-Fest | **Volunteer**
Talked with kids and adults who visited the Biology Department's booth about insects and reptiles

Memberships

2013 – now Botanical Society of America
2017 – now Paleontological Society
2022 – now International Organisation of Paleobotany
2018 – now Geological Society of America
2022 – 2023 Society for Sedimentary Geology
