

Curriculum Vitae

Guillaume Bogaerts

28 May 1997

Neunbrunnenstrasse 52, 8050 Zürich

guillaume.bogaerts@uzh.ch

+41.79.9450528

Scientific Expertise

Glucose metabolism, gut-brain axis physiology, neuroimmunology, molecular virology

Technical Skills

in vivo: Microsurgery (small animals) stereotaxic injections & vascular catheterization; Energy expenditure models & Behavioral tests; Rodents breeding maintenance; *C. elegans* husbandry

in vitro: Mammalian cell culture & Viral infection models (PFU & TCID50), Protein (-DNA/RNA) interactions revelation; Bacterial cloning; Immunohistochemistry

ex vivo: Multiplex in situ hybridization; Explants stimulation

Bioinformatics – Statistics

Skilled: Gene Ontology, DAVID, QuickGO, GraphPad Prism, QuPath

Low to moderate competence: FASTA-FASTQ files generation, UNIX, R, Scaffold (quantitative analysis of spectral counting)

Certificates

Felasa B: Laboratory Animal Sciences Practice (Belgium (40h - 2021) & Switzerland (LTK1 - 2023))

Certificate of training in laboratory safety (Belgium 2021 & USA 2022)

Quality assurance course (QC, GMP, GLP, GDP - 2021)

Microsurgical skills - 7 days of glucose clamping course (56 hours) at RRSSCs - Almere (NL)

Conferences Attendance and Participation

- Swiss Winter Conference on Ingestive Behavior (St. Moritz)
- Society for the Study of Ingestive Behavior
- LS²: Live Sciences Switzerland Annual meeting

Teaching Activities- Supervision of Students

- Veterinary Medicine Physiology practical lecture (Bachelor students)
- Molecular Biology lecture (Bachelor students)
- Journal Club/Articles presentation skills (Master students)
- Bachelor thesis supervision (6 weeks, 2024)
- Medicine Master student (7 weeks - July to September 2023)
- Veterinary Master thesis supervision (10 months, ongoing)

Experience

- **PhD position University of Zurich:** “Role of hypothalamic AgRP neurons in amylin action”. Currently, with Pr. Dr. Thomas Lutz (Switzerland, 1st October 2022- ...)
- Instech, NNF-CBMR, and RRSSC - 7 days **Glucose Clamping Course** (Almere, April 2023)
- **Internship Stanford University:** “Characterization of a-synuclein single-copy knock-in models in *C. elegans* & Study of neuro-protective and lifespan extending factors secreted by the intestine” 6 months with Pr. Anne Brunet & Dr. Jason Miklas (USA, 2022)
- **Master thesis University of Namur:** “Function of secondary RNA structures in the translational regulation of the Schmallenberg virus (RNA-protein interactions)” 10 months with Pr. Benoit Muylkens & Dr. Damien Coupeau (Belgium, 2021-22)
- Internship Marine Biology & Ecosystems: 1 week in Brittany (France, 2018)

Academic Activities

- ◇ President of a non-profit student association: Faculty of Sciences – University of Namur (2020-21)
 - Organization of main events for the Biology Department (1st year bachelor introduction, conferences, students - professors' meetings, river depollution, ski, etc.)
 - Organization of main events for Belgium students (InterUni activities, sanitary causes, etc.)
 - Active participation in debates regarding student rights
- ◇ Cash and accounting management in a non-profit student association: Faculty of Sciences – University of Namur (2019-20)

Non-Academic Activities

- ◇ Tennis formation at the Belgium Tennis Federation (10h/week for 8 years)
- ◇ Scouts' leader: 4 years

Languages

French (Mother language) **English** (C1) **Dutch** (B1-B2) **German** (A1-A2)

Education & Academic Background

2022-2026 PhD at University of Zurich (ongoing)

2020-2022 Master's degree in Biochemistry & Human, Molecular and Cellular Biology at the University of Namur. Grade: Distinction

2016-2020 Bachelor's degree in Cellular Biology at the University of Namur

Academic References
