

Apply to be a Science Corps Fellow - Entry #3399

Name
Matthew Reinhold
Email
mackreth.reinhold@gmail.com
Gender
Male
Residence: City (State), Country
Stanford (California), USA
Nationality
United States
When did you or do you expect to complete your PhD?
March 2026
Please tell us briefly about your university education (institution, city, country, year)
University of New Hampshire. Durham, NH (B.S. Physics - Astronomy) 2011 Southern New Hampshire University. Manchester, NH (M.Ed. Education) 2014 Pennsylvania State University. University Park, PA (M.S. Geosciences) 2019 Stanford University. Stanford, CA (PhD Planetary Science) 2026
Why would you like to be a Science Corps Fellow?
I aim to develop the skills for curriculum building and instruction that I can then apply to future, more permanent teaching positions.
In addition to your studies, please describe any prior experience that may help you as a Science Corps Fellow.
My teaching experience began with service in the AmeriCorps program as a middle and high school educator in high-needs areas. During this time, I worked with at-risk youth at an alternative high school and an inner-city middle school, developing a deep understanding of teaching in diverse communities and accounting for a variety of socioeconomic backgrounds. During graduate school, I served as a teaching assistant for multiple Introductory Geology courses, where I led laboratory sections and provided individualized instruction to students. During my graduate studies, I have engaged extensively in public outreach. I have regularly delivered advanced lessons on astrophysics, planetary science, geology, astrobiology, and cosmology to elementary and middle school audiences, focusing on making complex scientific concepts accessible and engaging. Most recently, I have served as a

speaker and presenter at the De Anza College Planetarium. In all these cases, I work with the aim of inspiring students and the public to think critically about the universe and their place within it.

Where do you imagine yourself professionally in the future? Check all that apply.

In science education

In science outreach

Please expand on your selection above and describe where you imagine yourself professionally in the near (~2 year) and long-term (~10 year) future.

In the next few years, I imagine being a teacher in physics, astronomy or Earth science at either a high school or teaching-focused college. This would be a steppingstone for my long-term career as an educator. In 10 years, I see myself as a tenured professor at a community college or other teaching-focused institution. Ideally, this position will also involve educational outreach to the community.

Please upload your CV (.pdf)
