

Kishwar Iqbal

kishwar.iqbal@chem.ox.ac.uk | Oxford, United Kingdom | + 44 7544 528073

Education

University of Oxford

Ph.D., Physical and Theoretical Chemistry

Oxford, UK

Expected Dec 2025

University of Durham

MSc, Physics and Chemistry

First class honours (ranked within **top 3% of cohort**, **J.A. Chalmers prize** for best thesis)

Durham, UK

Aug 2020

Experience

University of Oxford

Postdoctoral Research Associate (formerly **Doctoral Researcher**)

Oxford, UK

Oct 2020 – Current

- **Managed** two independent projects — advanced optical instrumentation and deep learning for life science imaging — leading idea generation, hypothesis testing, experimental design, execution, and **data-driven decision-making** with a cross-disciplinary team. Produced multiple **first-author publications** in Nature and ACS portfolios and delivered **invited international presentations** engaging **2,000+ experts** resulting in ongoing collaborations impacting biotech innovation and **drug discovery**.
- **Invented** a next-generation optical microscope by demonstrating the proof-of-concept experiment that showed a **4x sensitivity improvement**. Resulted in a **patent filing** and **commercialisation discussion** with the CTO, directors and senior staff of a **£70M-funded Oxford spin-out**.
- Addressed a critical research problem by **developing** an **artificial intelligence**-based solution that **doubled performance**, creating **software** projected to impact **10,000+ users** in industry and academia.
- **Translated complex data** and experimental findings into **clear insights** with **impactful visuals**, delivered across **100+ presentations** to teams, conferences, and commercial stakeholders.
- **Collaborated** with world-leading experts in protein biophysics by co-developing a best-practice **Nature Protocols publication**, enabling **knowledge transfer** of assay practice across **100+ labs** worldwide.

Candesic, Strategy Consulting (life science & healthcare)

Incoming Analyst

London, UK

Dec 2025

- Executed a **commercial due diligence** for a PE investor on a UK healthcare services provider, sizing a £600m+ addressable market with double-digit growth driven by demographic tailwinds and public-sector capacity constraints.
- Built a bottom-up market, utilisation, and revenue model across a multi-site clinical network, assessing payer mix, capacity constraints, competitive dynamics, and balance-sheet risk to synthesise a clear investment recommendation under tight timelines.
- Converted selective commercial due diligence case into a **full-time Analyst offer**.

Exeter College, University of Oxford and various institutions

Mentor

Oxford, UK

June 2020 – Current

- **Led** academic **tutorials** and **workshops** using interactive demonstrations, discussions, and real-world applications. Earned consistent praise from parents, teachers, and professors for engaging sessions.
- **Diagnosed** individual strengths and weaknesses and tailored strategies for **100+ students** across diverse academic and international backgrounds, **improving exam performance** by **10–20% on average**.

Leadership and Activities

Scientific Visualisation Course

Online

Founder and Creator

Aug 2025 – Current

- **Founded** an online course on high impact, **data-driven storytelling** through **visualisation** strategies for academics, professionals and students. **Early-stage venture** piloting **market entry** through mailing list sign-ups and workshops. Built an early community of **100+ interested researchers**.

Van Mildert College Scholarship — awarded to 1–2 top students annually for outstanding academic achievement (University of Durham).

Skills & Interests

Leadership & project management (key deliverables: publications, patents, conferences). Data visualisation & insights (presentations, entrepreneurial venture). Artificial intelligence pipelines (software creation). Commercial awareness (patent, spin-out collaboration). Diversity & inclusion (Oxford Access & Outreach leader). Outdoor activities and strength training. Culinary creativity. Global experience (UK, South Asia, East Asia).
