

Science Corps Fellowship Application

Thank you for your interest in becoming a Science Corps Fellow. Please complete all required fields. We review applications on a rolling basis.

First Name *

Katie

Last Name *

Dames

Email *

katiedames03@gmail.com

Gender

Male

Female

Non-Binary

Residence: City (State), Country *

Chicago, Illinois, United States

Nationality *

American

When did you or do you expect to complete your PhD? (month and year) *

May 2026

Please indicate the university where you earned (or are currently pursuing) your PhD *

Tuskegee University

Why would you like to be a Science Corps Fellow? *

Science Corps presents an incredible opportunity to pass on the scientific knowledge that the past ten years of higher education have given me. Receiving exceptional mentorship and one-on-one training across complex scientific fields has been transformative, and sharing that knowledge with young students has become an important part of my journey. From serving as a summer science camp counselor to helping organize statewide science fairs in Alabama, I have seen how hands-on learning sparks curiosity and confidence. My background in environmental science, marine and freshwater wetland ecology, and climate research has allowed me to communicate science from laboratory, field, and computational perspectives. Science Corps' mission to build lasting scientific capacity through education aligns deeply with my belief that science should inspire, empower, and be accessible to every community.

In addition to your studies, please describe any prior experience that may help you as a Science *
Corps Fellow.

Beyond my doctoral studies, I have actively pursued opportunities to mentor and engage students in science. I served as a youth summer science camp counselor and helped organize statewide science fairs in Alabama, experiences that strengthened my ability to communicate scientific concepts through hands-on learning. I have also mentored undergraduate and graduate students in laboratory and field settings, encouraging curiosity, critical thinking, and confidence. My interdisciplinary research has required collaboration with scientists across ecology, climate science, molecular biology, and environmental modeling, while fieldwork in wetlands and coastal ecosystems has taught me adaptability, teamwork, and problem-solving. Whether leading field activities, presenting research, or mentoring students, I strive to make science approachable, engaging, and meaningful for learners of all backgrounds.

Where do you imagine yourself professionally in the future? Check all that apply. *

- ☒ Scientist in academia
- ☒ Doing science in industry
- ☐ Administrative role in industry or academia
- ☐ In science education
- ☐ In science outreach
- ☐ Other:

Please expand on your selection above and describe where you imagine yourself professionally *
in the near (~2 year) and long-term (~10 year) future.

In the next two years, I envision continuing to build my expertise as an environmental scientist through interdisciplinary research and applied climate risk assessment. I hope to contribute to projects that evaluate how changing precipitation, temperature, and extreme weather patterns affect vulnerable ecosystems and communities while translating scientific findings into practical solutions for conservation and resilience.

Over the next ten years, I see myself leading an internationally collaborative research program focused on climate resilience, wetland ecology, and ecosystem restoration. I also hope to serve as a visiting scholar and invited lecturer, sharing scientific knowledge with universities and communities around the world. Whether working in academia or applied environmental science, I want my career to bridge rigorous research with education and public engagement, helping train the next generation of scientists while ensuring science remains accessible and impactful beyond the laboratory.

How did you find out about Science Corps? *

- ☒ An email list in your institution
- ☐ A post on a job-site
- ☐ An entry in a post-doc search resource (e.g., ecojobs.net)
- ☐ Referred by a previous fellow
- ☐ Referred by a friend/colleague/supervisor in academia
- ☐ Other:
