

Science Corps Fellowship Application

Thank you for your interest in becoming a Science Corps Fellow. Please complete all required fields. We review applications on a rolling basis.

First Name *

Elena

Last Name *

Giuliano

Email *

elenagiuliano3@gmail.com

Gender

☐

Male

☒

Female

☐

Non-Binary

Residence: City (State), Country *

Adliswil (Zurich), Switzerland

Nationality *

Italian

When did you or do you expect to complete your PhD? (month and year) *

I defended my PhD in February this year and obtained the title of Doctor of Science on the 20th of May 2026.

Please indicate the university where you earned (or are currently pursuing) your PhD *

ETH Zurich (Switzerland)

Why would you like to be a Science Corps Fellow? *

Since before my PhD defence this February, I have been thinking about travelling to new places to help communities with everyday activities. For this reason, when I read about this fellowship at CVIF, I was excited about the opportunity to teach science and support the education system in the Philippines. Being a Science Corps Fellow would give me the opportunity to provide my small but hopefully significant contribute to the community and to encourage young minds to find their own path and believe in their capabilities. It would be interesting to develop study programs in biology and environmental sciences, and perform small experiments with plants and soil and basic data analysis exercises to give students an idea of the experimental process. Moreover, I would have the chance to explore a job different from research, exchange knowledge with students and I would go back to when, as a student, I enjoyed explaining biological topics to family and friends looking at real-life examples.

In addition to your studies, please describe any prior experience that may help you as a Science *
Corps Fellow.

I worked on plant science and microbiology during internships in Italy, Spain, the Netherlands, and Switzerland, and during my PhD at ETH Zurich in collaboration with the USA. These experiences improved my scientific knowledge but also my ability to adapt and manage work abroad. Moreover, I gained experience in science outreach by, for example, writing online articles, managing social media for the online blog Facts&Reasons, creating a series of interviews for an ETH research group and managing guests, filmmakers and the photography of the Zurich Global Science Film Festival 2024. I have also acquired teaching experience by supporting practical university classes about comparative anatomy, plant physiology and soil microbiology. Lastly, due to my classical background in high school, I built a strong foundation and passion for writing and I would love to teach it in science as well as to promote the knowledge of science through history by integrating the humanities into STEM subjects.

Where do you imagine yourself professionally in the future? Check all that apply. *

- ☐ Scientist in academia
- ☐ Doing science in industry
- ☐ Administrative role in industry or academia
- ☒ In science education
- ☒ In science outreach
- ☐ Other:

Please expand on your selection above and describe where you imagine yourself professionally *
in the near (~2 year) and long-term (~10 year) future.

In the next two years, I see myself still living abroad and travelling, supporting science outreach events, planning training programs and teaching, or managing science projects in research institutions, nonprofit organisations, or schools. As I like creativity and art, I would ideally have a job where I can combine and integrate knowledge about multiple fields and perform different tasks, such as creating written and visual outreach contents and teaching. In the long-term, I would like to still dedicate my time to these activities, improving the exchange between disciplines, and hopefully having a tangible impact. It would be nice to also develop a personal communication idea or project harnessing the power of social media and collaborating with schools, institutions or museums.

How did you find out about Science Corps? *

- ☒ An email list in your institution
- ☐ A post on a job-site
- ☐ An entry in a post-doc search resource (e.g., ecoevjobs.net)
- ☐ Referred by a previous fellow
- ☐ Referred by a friend/colleague/supervisor in academia
- ☐ Other:
